

**Restatement of the Stipulation on the Country of Origin of Exhibits
at the First China International Import Expo**

Dear Exhibitors,

Sincere thanks should be extended for your active participation in and significant support for the first China International Import Expo (CIIE). According to the stipulation in *Exhibition Contract*, all exhibits to be showed at the Expo must comply with the principle of being produced or providing services outside China. For this, the Organizers hereby make this restatement of exhibits' country of origin. Moreover, we will conduct strict examination of the country of origin of exhibits to be carried into the exhibition hall.

It is recommended that all exhibitors make advance preparations of certificate of origin or customs declaration certificate or tariff completion documentation issued by the customs and other relevant materials to submit to the official freight forwarder of corresponding exhibition halls for review while making exhibits registration and applying for transport certificates. During the construction period, the Organizers will make selective examination of the relevant documents about the exhibits' country of origin.

Due to the fact that National Exhibition and Convention Center (Shanghai) will make strict management and control over the vehicles from

the construction stage, the official freight forwarder of each exhibition hall will also require the exhibitor to submit the exhibit list and relevant certificates of import when the freight forwarder contacts the exhibitor to apply for transport certificates, in order for the successful beginning of move-in and construction. For the move-in period, the Organizers together with the freight forwarder will run a close check of the exhibit list before their entry into the hall.

The Organizers reserve the right to require the exhibitor to make adjustment of some exhibits that do not meet relevant requirements. In the meantime, the freight forwarder has the right to refuse to handle entry certificates and formalities likewise. The Organizers have the right to refuse the exhibits that cannot meet the exhibits qualification.

Please pay attention to this statement.
