Notice for Reading

Dear readers and users of the *Exhibitor and Exhibit Information of the Third China International Import Expo*,

On the basis that exhibitors volunteer to provide relevant information, the China International Import Expo Bureau (hereinafter referred to as the "CIIE Bureau") compiles, not for profit, and freely provides the *Exhibitor and Exhibit Information of the Third China International Import Expo (CIIE)* (hereinafter referred to the *Exhibitor and Exhibit Information*) in order to timely provide buyers and relevant units with information about the exhibitors and their exhibits and facilitate the matchmaking and negotiation before the CIIE.

The information on relevant exhibitors, their commodities or services has been provided by corresponding exhibitors of the third CIIE. Meanwhile, such exhibitors will be liable for the truthfulness, accuracy, and validity of what they have provided. The CIIE Bureau just collects, arranges, and releases relevant information.

When you read or use the *Exhibitor and Exhibit Information*, please contact the CIIE Bureau timely if any untruthful or unfaithful information is found, for prompt verification and correction. If any suspected illegal condition is found, relevant legal provisions can be referred to for disposal or please immediately contact the CIIE Bureau and we will remind relevant units for rectification.

It is hereby declared.

Introduction to Exhibition Area

With advanced technologies at its core, the Intelligent Industry & Information Technology Area leads the innovation trend of this industry and attracts important exhibitors and buyers in the field, providing a communication platform for the global manufacturing industry; it is also a high-end display and communication platform of international manufacturing enterprises for promoting transformation and upgrading and facilitating high-quality development.

Based on the automation and intelligent manufacturing, the Intelligent Industry & Information Technology Area will put emphasis on integrating the industrial development trends, including high-speed precision, flexible integration, demand personalization, enlargement and recombination, green and energy conservation, customization, integrated solution and product lifecycle management. In this exhibition area, global leaders in various segments of the equipment manufacturing industry will intensively display high-end equipment and key technologies, and share the latest development ideas of the industry, thus inspiring the application imagination, boosting

innovation and transformation, and leading new development trends of the industries such as automation, intelligence and customized manufacturing.

Meanwhile, the Green Technology Special Exhibition Zone will be established. Adhering to the idea of energy conservation and environmental protection, the Green Technology Special Exhibition Zone aims to drive the trend of "green manufacturing", display international cutting-edge equipment and solutions to energy conservation and environmental protection, and synchronously conduct supporting activities like the matchmaking conference during the CIIE, covering key fields such as conservation of energy and water & new energy, comprehensive recycling of resources and environmental protection. The exhibition themes include clean energy heating, beautiful countryside, Yangtze River protection, turning waste into wealth, conservation of oil, gas and water, and green industrial parks.

John Deere

◆ Brief Introduction to Exhibitors

Founded in 1837, headquartered in the United States, John Deere is one of the exhibitors of the Second CIIE. John Deere is a world leader in providing advanced products and services for agriculture, forestry, construction, lawn and turf care, and landscaping. It is also a leading worldwide manufacturer of diesel engines for off-highway applications and one of the largest equipment finance companies in the United States. John Deere China has about 2,500 employees, 5 manufacturing facilities, a product R&D center, a domestic supplier network, more than 100 dealers and after-sale service system, convenient part support, and financial services. Our products include low-, mid- and high-horsepower tractors, combine harvesters, crop care products, excavators, loaders, drivetrains and diesel engines.

◆ Highlights

Commercial Embroidery Machine PR670E

Equipped with a 10.1" built-in high definition LCD touch screen display, 675 built-in embroidery designs, and LED embroidery pointer, as well as 17 built-in teaching videos, it can realize a maximum embroidery area of 300 x 200 mm.

Picture 5: Product Diagram of Commercial Embroidery Machine PR670E

INKvestment Tank All-In-One Color Inkjet Printer MFC-T920DW

The device is equipped with a 1.8-inch LCD screen, supports LAN/WIRELESS networks, and realizes a 20-page automatic document feeder, a 150-page fully enclosed large paper tray and high-volume printing of black 7,500 pages and color 5,000 pages.

Picture 6: Product Diagram of INKvestment Tank All-In-One Color Inkjet Printer MFC-T920DW

Thermal Transfer Barcode Label Printer TD-4420TN

It is used for transfer barcode printing, with print speeds up to 6ips, 203 dpi print resolution, 108 mm print width. It supports printer command FBPL-EZD (EPL, ZPL, ZPL2, DPL) and such ports as USB, USB HOST, Wired, and Serial.

Tarw-Trading OY Ltd

◆ Brief Introduction to Exhibitors

Formed by the merger of W-sub and Tarwell Oy in 1994, it is an enterprise engaged in the R&D and production of tourist submarines, with a wide range of business covering the technical research, production and repair of tourist submarines, and the R&D, design and production of products such as underwater motors, yachts, submarines, and helicopter escape systems. As a leader in the sector of submersible R&D technology, the company has been the choice of a group of engineers who are experienced in the submersible R&D for more than 30 years and have once designed private submarines for world-renowned personages. Currently, the company mainly engages in the drawing design, technical guidance, key components procurement, submarine sales, and other businesses. It has provided spare parts replacement, maintenance, and other after-sales services for "The Mermaid" tourist submarine of Sanya, Hainan.

◆ Highlights

The 45-*chi* Luxury Yacht (with an underwater sightseeing cabin)

This luxury yacht with a length of 13.5 meters can carry 22 passengers at a time and is made up of the upper part of the yacht and the lower part of the underwater pressure hull. The yacht is designed and built by an Italian yacht designer, and the underwater sightseeing cabin is made of acrylic materials, which assures the super high definition and safety after strict strength calculation and classification society certification.

Picture 10: Product Diagram of the 45-*chi* Luxury Yacht

The Multifunctional Submersible Vehicle

In addition to the scientific investigation, exploration, surveying, and mapping of the seabed, as well as underwater breeding, sampling, and rescue, the submersible vehicle equipped with the multifunctional hydrologic detector can carry out the hydrologic monitoring. The submersible vehicle with a capacity of 3 people can reach a depth of 300 meters underwater. By virtue of the soft/hard ballast system, it can achieve

smooth diving and floating. Furthermore, the 4 high-performance underwater propellers equipped on the submersible vehicle ensure the underwater precise control.

m-tec

◆ Brief Introduction to Exhibitors

Established in 1978, m-tec Mathis Technik GmbH (hereinafter referred to as "m-tec") is a world-leading technology & equipment supplier of the dry-mixed mortar, who provides global customers with integrated dry-mixed mortar solutions covering plant equipment, logistics systems, site equipment, and mortar formulation technology. It has participated in the Second CIIE. With more than 100 patented technologies, m-tec Mathis is especially adept at the mixing, conveying, and dosing of the dry-mixed mortar. In 2003, m-tec officially entered the Chinese market, consistently promoting the commercialization of China's dry-mixed mortar market and the construction mechanization.

Official Website: www.m-tec.com

Contact Person: Luo Yanbing

Contact: baili@zoomlion.com

◆ Highlights

GIGA mixer

It can be used to process the dry-mixed mortar in which the particle size is up to 8 mm in diameter and used for the large-scale and efficient mixing of materials, such as floor mortar, masonry mortar, and premixed

concrete. It can also meet the mixing needs of multi-quality mortar and industrial concrete for large-area buildings and bridge projects.

Picture 12: Product Diagram of GIGA mixer

Speedy

Being small and portable, the equipment can be used to process the aggregate in which the particle size is not more than 2 mm in diameter. It is also used for the spraying through pumping of certain materials, such as decoration mortar and decorative painting.

Picture 13: Product Diagram of Speedy

SMP

It integrates the silo and double-mixing pump of m-tec, which makes the storage of dry-mixed mortar and the construction involving the mortar more systematic and reasonable, and satisfies the demand for bulk materials in construction.

Picture 14: Product Diagram of SMP

Universal Robots

◆ Brief Introduction to Exhibitors

Universal Robots, founded in Denmark in 2005, is a manufacturer of collaborative robots with a global market share of 50%. Universal Robots established a branch in China in 2013, whose headquarters is in Shanghai. Currently, Universal Robots has set up offices in Beijing, Shanghai, and Shenzhen.
