NEW ERA SHARED FUTURE

Appendix 1 Notice on Fire Safety Control

1. General Requirements

- 1.1 Exhibitors, constructors and service providers shall comply with the fire safety policies and guidelines of the People's Republic of China and Shanghai and strictly observe each rule, regulation and provision. Matters related to fire safety at the Expo will be carried out in accordance with Fire Protection Law of The People's Republic of China, Code for Fire Prevention in Design of Interior Decoration of Buildings, Provisions on the Administration of Fire Control Safety of Key Fire Safety Entities, Code of Design for Fire Protection and Prevention of Exhibition Building and Exhibits Arrangement and other laws and regulations.
- 1.2 During the move-in, the exhibition period and move-out, all matters related to booth set-up, decoration, dismantling and maintenance shall be carried out in compliance with the Organizers' fire safety rules and requirements, including Exhibitor's Manual, Pre-Expo Notification, Move-in Instructions, Safety Instructions, Venue Notices and User's Manual for Exhibition Halls in the National Exhibition and Convention Center (Shanghai), Security Management Standards for Facilities Built in NECC etc. The exhibitors, constructors and service providers shall actively cooperate with the Chinese government departments and the Organizers with respect to the supervision, inspection and management.
- 1.3 In order to further strengthen the importance attached to safety at the Expo, fulfill safety-related obligations and assume safety responsibilities, the Organizers have drawn up the Special Booth Safety Responsibility Letter, which shall be signed and stamped with the official seal by all exhibitors and their constructors, and submitted to the official constructor of the venue before the deadline along with a copy of the constructors' business licenses. For more information, please refer to **Form 13: Special Booth Safety Responsibility Letter**.
- 1.4 Exhibitors and constructors must establish a safety inspection system and organize fire safety courses and training. They shall assign dedicated personnel for fire safety, who shall have a safety officer logo or other appropriate markings on their apparel while at the venue.

2. Booth Set-up

- 2.1 **Constructors of all special booths shall report to the official constructor of the venue for approval.**
- 2.2 In addition to exhibits, booths and all articles (such as walls, carpets, floor, ceilings, light boxes, wall paintings, and other building and decorative materials) used for other structures at the venue shall use non-combustible or fire-resistant materials approved by the Shanghai Fire Brigade for their construction and decoration, and their flammability shall be no lower than Class B1 (not easily flammable); the flammability of the carpets for the booths shall be no lower than Class B1 (not easily flammable); flammable materials used sparingly or partially, including timber structure and mesh fabrics used on the top, shall have undergone fire retardant treatment (which shall be completed before entry), and can only be used after their flammability level meets Class B1, as approved by the Shanghai Fire Brigade.
- 2.3 Flammable materials such as elastic fabric, bamboo, straw, foam and artificial green plants are prohibited even after they have undergone fire retardant treatment.

- 2.4 The materials and structures used during booth set-up shall not hinder the fire safety system or block fire exits, public passages and entrances at the venue. Any behavior that may impede the functioning of fire safety facilities at the venue such as manual fire alarms, fire hydrants, shutter doors, fire extinguishers and fire exits, is prohibited. If any such act is committed, the exhibitor and constructor shall adjust their set-up program in accordance with fire safety requirements and bear all expenses incurred in the process.
- 2.5 The width of the channel between the materials or structures used during booth set-up and the fire hydrants, equipment room doors or fire alarms shall be ensured to be normally open or passable; and at least 0.6 meters shall be left between the walls of the exhibition hall and those materials or structures to ensure a clear and open repair passage is available.
- 2.6 No object shall be attached to or hung on any sprinkler or lighting device at the venue; no spotlight or heat generating device shall be pointed at or placed close to a fire sprinkler.
- 2.7 The ceiling/canopy of a booth, if any, shall use fire-proof materials and shall not impede the functioning of the venue's fire safety system and air vents. Fire extinguishers should be present at the booth as per fire safety regulations.
- 2.8 The number and width of an evacuation staircase in the upper exhibition area of a double-storey booth shall be determined as required, it shall have at least two staircases and the width shall not be less than 0.9 m. The horizontal distance between the nearest edges of two adjacent evacuation exits should not be less than 5 meters. When the upper one is used as an office space and the area is not larger than 120 square meters, one evacuation staircase can be set up.
- 2.9 An open staircase can be used for the double-storey booth, and its total width shall be determined by calculation and the minimum net width should be no less than 1.4 meters.
- 2.10 It is not recommended to install fully-enclosed special booths. If a fully-enclosed booth is larger than 160 m² and may hinder the use of the venue's fire safety devices, an automatic fire alarm system, automatic fire sprinklers and up-to-standard fire extinguishers shall be installed; if a fully-enclosed or semi-enclosed booth is larger than 120 m², it shall have at least 2 evacuation exits at least 0.9 meter wide.
- 2.11 Welding, cutting, drilling and other special construction techniques are forbidden at the venue. Operation with naked fire is also forbidden at the venue.
- 2.12 Special workers must possess special operation certificates or special equipment operator permits as per government regulations. They shall strictly follow the code of practice at work, and ensure no operation or activity violates it.

3. Fire Safety and Utilities

For more information, please refer to **Appendix 3: Utilities Safety Management Instructions to the Exhibitor's Manual**.

4. Paints and Coatings

- 4.1 During the move-in, exhibition period and move-out, it is forbidden to conduct any large-scale painting of the exhibits or exhibiting materials, etc. at the venue, or to use any pungent or non-eco paint or coating that violates fire safety requirements, for booth decoration.
- 4.2 With all safety precautions in place, minor paint touch-up is permitted after the application is approved during the move-in. Safety precautions at least include painting in a well-ventilated place, using non-toxic paints, and covering the ground around the cement floor with dry paper or plastic film.

- 4.3 It is forbidden to paint any vertical structure at the venue (i.e., walls, glasses, etc.) or to wash or dispose of painting materials inside or near the venue.
- 4.4 The exhibitors shall be liable for any damage or harm to the Organizers and the venue caused by their painting activities, and shall pay for the restoration of the damaged or contaminated sites.

5. Management of Hazardous Substances

- 5.1 Without the written approval from the Organizers, the venue and concerned government departments, it is forbidden to demonstrate or use any heater, grill, candle, lantern, torch, welding device or any other heat-generating, naked flame generating, or smoke-generating material; it is forbidden to demonstrate or use any electric, mechanical or chemical device that may be defined as dangerous; it is forbidden to use any flammable, explosive, toxic, or corrosive materials, including flammable liquids and gases, compressed gases, hydrogen balloons, explosives, and petroleum; it is forbidden to carry weapons, guns, swords, ammunition, explosives, radioactive substances and other hazardous substances, or anything forbidden by the concerned government departments, into the venue.
- 5.2 The inventory of hazardous solids or liquids stored at the booth shall not exceed one day's usage; all remaining stock shall be kept in an area designated by the Organizers.
- 5.3 No automobiles, motorcycles, and other diesel vehicles, new energy vehicles, or other fuel equipment at the venue shall be repaired, started, charged, or fueled, and the amount of fuel in their tanks shall be no higher than 10%.
- 5.4 Toxic or hazardous wastes shall be packed and sealed in proper containers, which shall be marked accordingly, and managed or disposed as per the government regulations on waste disposal.

6. Pressurized Containers

- 6.1 If any exhibitor needs to use helium, argon, nitrogen or other inert gases, they need to submit a written application to the Organizers and can only carry them into the venue after approval. They shall take full responsibility for the safety of pressurized containers during the use, management, shipment, storage, safekeeping, etc.
- 6.2 All pressurized containers or devices brought into the venue with the approval of the Organizers shall comply with relevant safety standards and requirements; devices and tubes using compressed air systems shall be resistant to a pressure level $\geq 15\text{Kg/cm}^2$, and pipe joints shall be fastened with hose clamps, and not tied with iron wires or other materials.
- 6.3 If it is found that a pressurized container is not properly installed, the Organizers will inform the exhibitor to immediately and safely evacuate it or transport it to a designated area. The exhibitor shall cooperate for the same.

7. Smoking Restriction

Smoking is forbidden in all indoor areas and parking lots of the venue. Smoking is only allowed at fixed smoking points set in the outdoor area of the venue.

8. Emergency Support

- 8.1 Each special booth, conference image point, and service desk shall be equipped with independent fire extinguishers, whose quantity and quality shall comply with legal requirements (generally with 5KG dry powder fire extinguishers, and electrical or precise instruments shall be equipped with 3 KG carbon dioxide fire extinguishers).
- 8.2 Emergency indicator lights, exit signs, exit instructions and other emergency support devices shall be installed in visible areas of the special booths.
- 8.3 Exhibitors and constructors shall establish a safety inspection system and appoint dedicated personnel for their booths to ensure fire safety during the move-in, exhibition period and move-out. In case of any emergency, the designated personnel shall take appropriate measures and report to the Organizers.

Appendix 2 Notice on Work Safety Control

1. General Requirements

- 1.1 Exhibitors, constructors and service providers shall earnestly comply with the work safety and labor protection policies and guidelines of the People's Republic of China and Shanghai Municipality, and strictly observe all regulations, ordinances, and provisions, including Production Safety Law of the People's Republic of China, Safety Requirements for Large-scale Activities (GBT33170-2016) and Exhibitor's Manual; and actively cooperate with Chinese government departments and the Organizers with respect to supervision, inspection, and management.
- 1.2 During the move-in, exhibition period and move-out, all matters related to booth set-up, decoration, dismantling and maintenance inside and outside the venue during the expo shall be carried out in compliance with the Organizers' work safety rules and requirements, including Exhibitor's Manual, Pre-expo Notification, Move-in Instructions, Safety Instructions, Venue Notices and User's Manual for Exhibition Halls in the National Exhibition and Convention Center (Shanghai), Security Management Standards for Facilities Built in NECC etc. The exhibitors, constructors and service providers shall actively cooperate with the Chinese government departments and the Organizers with respect to the supervision, inspection and management.
- 1.3 Constructors shall set a work safety management organization, and arrange for a full-time on-site construction manager, safety supervisor, emergency liaison, and other safety management personnel as per relevant provisions; they shall issue official and effective documents on the establishment and appointment of the organization and personnel; and their major principal and work safety management personnel shall have certification materials (or effective certificates) on their qualified work safety knowledge and management ability issued by the competent department for work safety supervision and administration. Before move-in, constructors shall, as per booth design schemes, work out a detailed construction scheme (including set-up scheme and dismantling scheme), and conduct construction as per the said scheme. The aforesaid materials shall also be submitted at the time of application for exhibition.
- 1.4 In order to further strengthen the sense of safety at the expo, fulfill safety-related obligations and assume safety responsibilities, the Organizers have drawn up the Special Booth Safety Responsibility Letter, which shall be signed and stamped with the official seal by all exhibitors and their constructors, and submitted to the official constructors of the venue before the deadline along with a copy of the constructors' business licenses. For more information, please refer to **Appendix 13: Special Booth Safety Responsibility Letter**.

2. Safety Control

- 2.1 Exhibitors and constructors thereof shall earnestly enforce a safety accountability system, reinforce their on-site safety inspection and management, and accept and follow the work safety requirements and regulations by the concerned government departments, Organizers and venue staff at the site.
- 2.2 Exhibitors and constructors thereof shall comply with relevant national rules and regulations of the construction industry and ensure that on-site constructors and especially workers have corresponding operation qualifications or work licenses.
- 2.3 Exhibitors and constructors thereof shall follow the principles of civilized construction and take proper safety precautions with respect to booth set-up, decoration, dismantling and maintenance during the expo, both inside and outside the venue. All workers shall wear safety helmets while conducting the move-in and move-out related work. Safety supervisors shall bear a safety officer mark on the site.

- 2.4 Booth set-up structure shall be produced in factory as much as possible, so that only splicing and installation will be needed on the site of set-up.
- 2.5 Exhibitors and constructors thereof shall establish a safety inspection system, and provide work safety education and trainings well. Before the entry for construction of set-up workers and drivers transporting special equipment at the venue, construction principal shall uniformly illustrate safety technologies, provide pre-job trainings about safe operation procedures and notes, and make records. No construction is permitted before pre-job safety trainings.
- 2.6 It is strictly prohibited to subcontract special booth set-up, maintenance and dismantling, or entrust the same to a subcontractor. To clarify accountability and liability for damages, exhibitors shall instruct their constructors or service providers to purchase relevant life insurance, property insurance, etc.

3. Booth Set-up and Plan Review

- 3.1 To ensure the safety and stability of the temporary structures for special booth set-up and avoid any possible risk and hidden danger, the maximum height permitted for the booths at the expo are 6 meters for a one-floor booth and 8.5 meters for a two-floor booth. Only single-storey booths are allowed to be built in the main aisle of the exhibition hall, with a limited height of 6 meters (including the lifting point); the height limit in other areas remains unchanged. Exhibitors with special booths shall submit relevant documents to the official constructor of the venue or plan review service provider for approval of their structures.
- 3.2 Staircases and ladders inside the booths shall comply with relevant technical specifications and safety requirements and shall be equipped with firm handrails to protect people from slipping.
- 3.3 To ensure the stability of booth structures, the pillars of the steel structure shall use non-welded materials at least 10 cm in diameter with welded pedestals at their bottom and have flange plates at least 60 cm in diameter on top to increase the load-bearing area. The size of the pillar base of the steel structure shall be determined in accordance with the overall load of the booth, and the pillar must be welded to the center of the base.
- 3.4 The main walls of all booths shall be at least 12 cm wide at the bottom to ensure sufficient contact area with the floor. Walls and steel structures spanning more than 6 meters shall be connected by crossbeams on top and supported by pillars at the bottom to ensure the rigidity and stability of the booth.
- 3.5 Load-bearing components shall use steel angles, U-bars, square tubes and other materials that meet corresponding Chinese national standards. Load-bearing components in special booths shall not use ornamental and flexible metals or brittle materials. Wooden load-bearing columns and supporting beams shall be lined with continuous solid wood square tubes inside to ensure their structural integrity and stability.
- 3.6 The single span of any wooden structure shall be no more than 6 meters wide and no more than 5 meters high. The single span of any steel or steel and wooden hybrid structure (including those lined with steel square tubes inside or equipped with iron frames) shall be no more than 8 meters wide. Molded steel grid structures can be wider depending on their cross-sections but shall be no more than 12 meters wide (except those used for professional stages).
- 3.7 The wooden walls of any frameless structure shall be at least 30 cm thick; and those with a frame structure shall be at least 10 cm thick. Wooden load-bearing walls shall be supported by square steel or seamless tubes inside them.

- 3.8 All booths decorated with glass shall use toughened glass with sufficient strength and thickness (cladding glass shall be at least 1 cm thick), installed stably in an appropriate manner. The glass shall be equipped with metal frames or professional hardware, and there shall be flexible beading between the frames or hardware and the glass to ensure the safe use of glass. Large glass materials shall be clearly marked at a 1.5-meter height to prevent people from smashing into the glass and getting injured. If a glass podium is used, the supporting pillars and walls of the structure shall be fixed to the ground under the podium, and the booth structure shall not be directly built over the smooth glass surface.
- 3.9 If a booth requires a podium, it is recommended to use a ramp-type podium. Angular podiums shall be no higher than 10 cm and marked with corresponding safety markings.
- 3.10 Relevant safety measures shall be taken for trussed booths to ensure the overall stability of the structure. The overall raise and drop of the trusses shall be commanded by special persons, scale shall be pulled on pillar in advance, and hoists at all lifting points shall operate simultaneously.

4. Booth Acceptance and Dismantling

- 4.1 After the completion of booth set-up, the constructor shall inspect it independently, and after the inspection is passed, apply for inspection and acceptance to the Organizers. Upon inspection and acceptance by the relevant department, the booth can be put into use. Inspection contents include structure safety, electrical safety, and fire safety.
- 4.2 The declaration system is implemented for the dismantling of more-than-6-meter-high special booths and trussed booths. An application for dismantling shall be submitted in advance, and dismantling can be conducted after the Organizers review the dismantling scheme again.

5. Working at Heights

- 5.1 Working at heights refers to working at an elevated place where there is a possibility of falling from a height of 2 m or higher.
- 5.2 A person can work at heights only if he or she is at least 18 years old and has passed a physical examination; people suffering from high blood pressure, cardiac disease, epilepsy, mental illness or other similar diseases are forbidden from working at heights.
- 5.3 Personnel working at heights shall wear protective gear (safety helmet, safety belt, etc.). Safety belts shall not be hung lower than the worker and must not be replaced by ropes. Working at heights while intoxicated is forbidden.
- 5.4 Personnel working at heights shall be accompanied by a supervisor to ensure on-site environment safety and the implementation of safety measures. Such personnel should follow the designated route to go up and down, and no one should stand below the workplace at height.
- 5.5 During work at heights, scaffolds shall not be set higher than 4 meters, and protective grating, cross bridging and brakes shall be installed in accordance with safety regulations, and the fixed footholds/load-bearing plates must be repeatedly inspected and reinforced. Tools, materials and parts used during the work shall not be carried directly in the hand or thrown away and shall only be kept in a tool bag. Scaffolds shall be fixed by brakes after installation, and be held by at least one person during work. Construction personnel are forbidden to move scaffolds on the operation platform. Tools, material fragments, spare parts and any other object that may fall from the height shall be removed and cleaned up after the operation to prevent any injury by falling objects.
- 5.6 It is forbidden to use a more-than-2-meter-high herringbone ladder for work at heights.
- 5.7 Persons engaged in work at heights must have a high-place work certificate, which shall be filed during the application for move-in.

- 5.8 Any lifting device used in booth set-up, decoration, dismantling and maintenance during the expo, shall be admitted into the venue only after an appropriate application is submitted and approved by the Organizers and venue management.
- 5.9 Matters not covered herein shall be subject to the Technical Code for Safety of Working at Height of Building Construction (JGJ80-2016).

6. Construction Tools and Labor Protection Articles

- 6.1 Class-II hand held tools must be used for on-site operation. The power lines of hand held electric tools shall be kept in the ex-works state, and shall not be arbitrarily lengthened.
- 6.2 Power boards shall not be used for building.
- 6.3 The hand lift used for building shall not be used in an overloaded way, and shall be equipped with safety devices including height limiter, overload alarm device, and rope-break protection instrument, and overturn-preventing safety measures shall be taken against it.
- 6.4 Construction workers shall use labor protection articles such as safety helmets and safety belts, which conform to the state regulations, and hold ex-works qualification certification within effective service life.
- 6.5 Construction workers shall wear reflective vests for construction at the venue.

7. Electricity Safety

For more information, please refer to **Appendix 3: Utilities Safety Management Instructions to Exhibitor's Manual**.

8. Special Equipment Management

- 8.1 Forklifts, truck cranes and other special equipment shall conform to state regulations, and pass the annual inspection for special equipment, and their drivers shall work with relevant licenses.
- 8.2 When front view cannot be confirmed, forklifts loaded with goods shall be driven back. If they have to be driven in the condition that the view is obstructed, there shall be a commander. A safety regulation mechanism shall be established.
- 8.3 In the condition of dim light, front lights of forklifts shall be turned on.
- 8.4 No person other than the driver shall sit in a 3T forklift. Loading quantity shall not exceed the rated load capacity of forklifts. Forklift safety education shall be provided for forklift drivers and related workers.
- 8.5 The driver shall wear a safety helmet when driving a forklift, reduce speed at the time of making turns, and remove the key when leaving the forklift.
- 8.6 Do not stand on a running forklift pallet for operation. Where it is necessary to do so, the handrail fixed to fork or the pallet with a frame shall be used, and operator shall fasten the safety belt.
- 8.7 Do not stand under goods to be loaded or within the scope of the turning crane of truck crane. Before move-in, inspections before the operation of forklifts and truck cranes and annual and monthly inspections shall be conducted.
- 8.8 A forklift shall be equipped with rearview mirrors and back-up buzzer.
- 8.9 When the goods to be loaded are to be held upright, the fork shall be declined, parking brake shall be pulled on securely, and the driver shall get off the forklift and stop the engine.
- 8.10 At the place where any operator or any other vehicle may appear such as crossing, a forklift driver shall pay attention to the surrounding environment at all times, whistle in time, and reduce the speed to ensure the safe stop in any case. Operators across channels shall stop confirm the safety of surrounding environment, and after confirming the stop of forklifts, cross channels.

- 8.11 When the paralleling goods are taken, the tip of the fork shall not contact inside pallet. Once goods are taken, the fork shall be fully inserted. In stacking, there shall be adequate intervals between neighboring pallets, and stacking height shall not exceed 2 meters. During taking, the safety around the goods shall be confirmed. Negotiations shall be conducted at safe places rather than those near the goods.
- 8.12 For the operation of truck cranes, signal riggers shall be arranged, and work with licenses.
- 8.13 Before the operation of truck cranes, all outriggers shall be stretched out, and square timbers shall be put under supporting feet. Body level shall be adjusted, level bubble shall be in the middle in the case of no load, and locating pins of outriggers shall be inserted. With respect of cranes with an elastically suspended chassis, stabilizer shall be tightened up before stretching out outriggers.
- 8.14 Outriggers shall be adjusted in the condition of no load, and arm lever already stretched out shall be retracted and turned to right ahead or back; it is forbidden to turn the outrigger valve during operation.
- 8.15 The amplitude of variation of truck cranes shall be steady during operation, and it is forbidden to raise or drop the arm lever; raising and falling shall be operated at a constant speed.
- 8.16 When the arm lever of a telescopic crane is stretched out or drawn back, it shall be conducted in the prescribed order. When the arm lever is stretched out, the lifting hook shall be laid down accordingly. Where the limiter gives the alarm, the stretching of the arm lever shall stop immediately; where the arm lever draws back, a too small elevation angle will be inappropriate.
- 8.17 The elevation angle of truck cranes during operation shall conform to instructions. Where the length of the front section of arm lever is bigger than that of the back section after the telescopic arm lever is stretched out, an adjustment shall be made so as not eliminate the abnormal circumstance before operation.
- 8.18 Where any outrigger sinks or crane is inclined during the operation of a truck crane, the loaded materials shall be laid down immediately. Operation is allowed only after the adjustment and the elimination of the unsafe factor.
- 8.19 During loading and unloading, there shall be no person in the cab of carrier vehicle, and materials shall not be lifted over the cab of carrier vehicle.
- 8.20 Where two cranes are involved in hoisting operation, the performances of the two cranes shall be similar, and the load of one crane shall not be larger than 80% of rated lifting capacity.
- 8.21 During work, a driver shall carefully operate, and shall not chat with others or take time off arbitrarily. "Ten No Hoisting" provisions shall be followed during hoisting.
 - 1) No hoisting in the case of unclear commanding signal.
 - 2) No hoisting in the case of inclined traction or hanging.
 - 3) No hoisting in the case of unclear lifting material weight or overload.
 - 4) No hoisting in the case of bulk materials not strapped firmly or materials loaded excessively.
 - 5) No hoisting in the case of any person on lifted materials.
 - 6) No hoisting in the case of materials buried underground.
 - 7) No hoisting in the case of failure or fault of mechanical safety device.
 - 8) No hoisting in the case of unclear lifting and landing points of materials due to dark light on the site.
 - 9) No hoisting in the case of no protection measure for the direct contact between materials with blade edges and steel wire rope.
 - 10) No hoisting in the case of gales of Grade 6 or above, thunder or high-voltage wires.
- 8.22 Before driving, arm lever, lifting hook and outriggers shall be drawn back. During driving, a medium speed shall be maintained to avoid emergency braking.

- 8.23 During driving, no person shall stand, nor shall materials be stacked on the chassis walking board; reversing shall be conducted under the supervision of a person.
- 8.24 After the operation, the arm lever of telescopic crane shall be fully drawn back and put well, and the lifting hook shall be hung well. The arm lever of the trussed arm lever crane shall be turned to the front of the crane, and be lowered to the position with an angle between 40° - 60°. Brakes of all structures shall be braked firmly, and doors of operating room and machine shed shall be closed and locked.

9. Emergency Support

Exhibitors and constructors thereof shall establish a safety inspection system and comply with it, and shall cooperate with the Organizers, the venue and concerned government departments in safety patrols, renovation and emergency evacuation protocols in a conscientious and responsible manner. They shall follow the instructions and implement them accordingly. In case of any emergency, they shall take appropriate measures and report to the Organizers.

10. Punishments

Regarding improper operations, the Hosts shall be entitled to impose corresponding punishments; concerning behaviors with bad influence or serious consequences, they shall be transferred to the relevant department for treatment.

Appendix 3 Utilities Safety Management Instructions

1. General Requirements

- 1.1 During the move-in, the exhibition period and move-out, all matters related to booth set-up, decoration, dismantling and maintenance shall be carried out in compliance with the Organizers' work safety rules and requirements, including Exhibitor's Manual, Pre-Expo Notification, Move-in Instructions, Safety Instructions, Venue Notices and User's Manual for Exhibition Halls in the National Exhibition and Convention Center (Shanghai). The exhibitors, constructors and service providers shall actively cooperate with the Chinese government departments and the Organizers with respect to the supervision, inspection and management.
- 1.2 Exhibitors and constructors thereof shall comply with relevant national rules and regulations of the construction industry and ensure that on-site workers and special workers have corresponding operation qualification certificates or work licenses.

2. Water Safety Management

- 2.1 If the installation of water facilities at a booth violates any rule or regulation or poses safety hazards, the Organizers or the venue are entitled to require the exhibitor or constructor to rectify the problem immediately. If they refuse to do so, their water supply can be cut off and they shall be liable for the consequences. If any accident or economic loss is incurred, the exhibitor or constructor shall be held liable and required to compensate for the loss as per relevant regulations.
- 2.2 Do not illegally transfer water from the venue facilities for domestic use. If any exhibitor or constructor illegally connects to the water pipes at the venue or uses the equipment without installing a valve at the venue, the Organizers or the venue management are entitled to require the exhibitor or constructor to rectify such behavior immediately. If they refuse to do so, their water supply may be cut off and they shall be liable for the consequences. If any accident or economic loss is incurred, the exhibitor or constructor shall be held liable and required to compensate for the loss as per relevant regulations.
- 2.3 Waste liquids, food waste and extreme temperature liquids shall be disposed at designated locations at the venue in the exhibitor or constructor's own sealed containers and shall not be disposed in drains inside and outside the venue, or in wash basins or sinks in washrooms; in case of any violation, exhibitors or their service providers shall be responsible for cleaning up the pollutants and liable to pay compensation for clogged pipes or other related expenses.
- 2.4 Water pipes crossing corridors shall be covered with slot plates to ensure safety.

3. Electricity Safety Management

- 3.1 The low-voltage power supply system at the venue is a three-phase five-wire 380V/50Hz system. Power distribution at the booths shall comply with the same standards. If any exhibit requires different voltage or frequency, the exhibitor or constructor shall bring their own power converters to resolve the issue.
- 3.2 The electricity box of a booth shall have an electrical fire monitoring system.

- 3.3 If a booth requires electricity supply for both lighting and power circuits, individual applications for each shall be separately submitted. Lighting circuits shall be equipped with leakage protectors. If the power circuit has been applied to dismantle leakage protector as per the procedures, then the power circuits don't need additional leakage protectors. Each special booth shall apply for its own circuit box and shall not share the circuit box with other booths.
- 3.4 Power units with independent switches and a power load less than 80% of the circuit box they are to be connected to, can be directly connected to a circuit box provided at the venue; if more than one power unit shares one circuit box, the exhibitors or constructors shall bring their own master circuit boxes whose protection setting limit value shall be less than or equal to 80% of that of the fixed circuit box at the venue to ensure power safety.
- 3.5 If the power load of a three-phase non-mechanical power unit is higher than or equals to 20 A, an air circuit breaker shall be installed to provide cascade protection. If the single-phase load is higher than 16 A, three-phase power supply shall be used to evenly distribute the power load and achieve balanced power distribution among the three phases.
- 3.6 Special electric equipment and 24-hour powered-on electric equipment shall have independent and category-specific circuits, and shall not share the same circuit with other equipment; important electric equipment or electric equipment for important occasions or positions shall have two power supply circuits (one main circuit and one backup circuit); each lighting power protection circuit can only be connected to at most 25 devices (including lighting devices and outlets) whose total load shall be lower than 3 KW or 16 A.
- 3.7 Electric material and equipment used shall comply with national product quality standards and certification standards and comply with national fire safety requirements. Electric materials shall have sufficient safe load-bearing capacity, which shall be higher than the rated current of the circuit box switch for the booth; they shall use ZR-BVV (fire-retardant double-insulated copper wires), ZR-RVVB sheathed wires or ZR-VV cables (three-phase and five-wire, referring to low-voltage power distribution system, shall use three-core or five-core wires), instead of twisted wire pairs (flexible wires), four-core wires (cables) or aluminum wires. Only lighting rectifiers and triggers that comply with fire safety department standards shall be used.
- 3.8 In case of any power failure at a booth, the Organizers or the venue staff shall have the right to enter the booth to conduct security check and adjust the Expo's power circuits and capacity. Exhibitors and constructors shall cooperate with the Organizers or the venue staff.
- 3.9 If the Organizers' worker discovers any hidden power safety hazards or serious security breaches at a booth, they shall have the right to suspend or cut off the power supply immediately without notifying the exhibitor. If any loss is incurred thereby, the exhibitor or constructor shall bear it.
- 3.10 Electric wiring work and equipment shall be set up strictly in accordance with the approved programs and drawings, and the power load shall not exceed the approved total load. If an exhibitor needs additional electrical appliances or other equipment that may result in a higher power load, the exhibitor shall promptly submit an application for it.
- 3.11 Do not use lighting devices whose power exceeds 500 W or use halogen-tungsten lamps. High heat-producing lighting devices shall be protected with insulation pads; light boxes, and lamp posts used for advertising shall have convection air vents.
- 3.12 All lighting devices installed shall be at least 30 cm from any exhibit, decoration or material; all heat-generating devices shall be at least 3 meters from any fixed power supply facility at the venue and shall not emit heat towards these facilities.
- 3.13 Do not use high-power electric heating appliances (e.g., electric kettles, stoves or irons). If an exhibitor needs to use such appliances, it is only permitted after acquiring the approval from the designated official constructor of the Expo.

- 3.14 Computers, precision instruments and other devices shall be equipped with uninterruptible power supply. If any damage or data loss is incurred due to such devices facing any power interruption, the exhibitors and constructors shall be liable for the consequences.
- 3.15 Exhibitors shall complete their security checks before applying for power supply to the official constructor of the Expo.
- 3.16 All wire (cable) terminals shall be equipped with blocks or switches. Do not connect them with electrical tape. The wires must be fixed firmly, and shall not be laid on the display stands, floor or the aisles. Do not hang wires, lighting devices or other objects on the ceiling or pipes. Wires crossing passageways shall be covered with slot plates, and wires going under a carpet or installed inside a structure shall not have terminals in the middle and shall be protected by a sleeve.

4. Gas Safety Control

- 4.1 If the installation of gas facilities at a booth violates any rule or regulation or poses safety hazards, the Organizers or the venue management are entitled to require the exhibitor or constructor to rectify such problems immediately. If the exhibitor or constructor refuses to do so, their gas supply shall be cut off, and they shall be liable for the consequences. If there is any accident or economic loss is incurred, the exhibitor or constructor shall be held liable and required to compensate for the loss as per relevant regulations.
- 4.2 Do not connect to gas pipelines without permission. If any exhibitor or constructor connects to the gas pipes at the venue without installing appropriate valves, the Organizers or the venue are entitled to require the exhibitor or constructor to rectify such behavior immediately. If they do not do so, their gas supply can be cut off and they shall be liable for the consequences. If there is any accident or economic loss is incurred, the exhibitor or constructor shall be held liable and required to compensate for the loss as per relevant regulations.
- 4.3 The venue will provide compressed air supply with an outlet pressure of 0.6-0.8 Mpa. Exhibitors can install driers, filters or other compatible devices depending on their own equipment.
- 4.4 If the air supply at a booth is between 1–1.6 m³/min, the exhibitor shall provide the actual requirement to the official constructor; in the absence of prior notice, the default air supply shall be less than 1 m³/min and the exhibitor shall be responsible for any ensuing liability or consequence.
- 4.5 If any exhibitor has any specific requirement for compressed air or requires the supply exceeding 1.6 m³/min, it is recommended that they bring their own air compressors and submit an application to the official constructor.
- 4.6 Exhibitors shall complete their security inspections before applying for gas supply to the designated official constructor of the CIIE.
- 4.7 Gas pipes running across corridors shall be covered by slot plates for safety considerations.

Appendix 4 Notice on Network Security Control

1. General Requirements

Exhibitors, constructors and service providers shall earnestly comply with the network security policies and guidelines of the People's Republic of China and Shanghai Municipality, and strictly observe regulations, ordinances and provisions, including Cyber Security Law of the People's Republic of China, Telecommunications Regulations of the People's Republic of China, Decision of the Standing Committee of the National People's Congress on Internet Security Protection, Computer Information Network and Internet Security Protection and Management Regulations, Provisions on the Technical Measures for the Protection of the Security of the Internet as well as other relevant laws, regulations, administrative rules, and documents.

2. Access Instructions

- 2.1 There are two ways to access Internet at the site of CIIE: wired broadband connection and free public Wi-Fi. Users shall use their own network access devices (including routers, computers, smartphones, etc.).
- 2.2 Matters on network access to the broadband on the venue shall be handled as per the Internet application processes of the Organizers. The independent application for network access via any other channel is not allowed. For any network access via any unofficial channel without permission, the Organizers shall have the right to suspend network access. If the circumstance is serious, the Organizers will coordinate with relevant departments to investigate and treat relevant persons according to the law.
- 2.3 The Organizers shall have the right to use appropriate technologies to monitor network access. If any commercial activity is conducted through the network without permission (e.g., use of the wired broadband to build a cross-booth network or build a wireless network, etc.), the Organizers shall have the right to claim corresponding charges and take such measures as network outage and/or prohibition from access.
- 2.4 Exhibitors, constructors or service providers shall not cause damage to any network facility or leased equipment inside the venue. Otherwise, they shall be liable to make corresponding compensations.

3. Safety Control

- 3.1 It is required to abide by the Internet security laws, public order and social ethics of the People's Republic of China and shall not undermine the network security. They shall not use the Internet to endanger the national security, dignity and interest of the People's Republic of China, instigate any attempt to subvert the state power of China, overthrow the socialist system or divide or disunify the country.
- 3.2 It is prohibited to use the Internet to advocate terrorism, extremism, racial hatred, discrimination, or spread violent or pornographic information; to fabricate or spread false information that may disrupt economic and social order; and to illegally access personal information of others or infringe on others' reputation, privacy, intellectual property rights and other legitimate rights and interests, etc.
- 3.3 In accordance with the cyber security laws of the People's Republic of China, the staff members of the exhibitors, constructors and service providers that intend to access the Internet shall login to the network using their verified IDs and shall retain their user registration information, cooperate with concerned government departments if necessary, and provide relevant data.

- 3.4 Exhibitors, constructors or service providers shall use the network services appropriately and shall not create Wi-Fi hotspots without permission; in case there is any situation that may undermine the network security and operation, the Organizers shall have the right to terminate such users' Internet access.
- 3.5 As the network is partially open, exhibitors shall independently take precautions to protect their computers, update their operating systems and install security management and antivirus software, to prevent leakage or loss of any personal information; in case of any data leakage, they shall be liable for the consequences.
- 3.6 Any exhibitor intending to independently set up a large LED screen for presentation purposes shall appoint professional personnel to manage it; if the screen needs to be connected to the Internet, the exhibitor shall take appropriate precautions against hacking, tampering, interruption and unauthorized setting.
- 3.7 To ensure safe and successful operation of network services, the Organizers have the right to conduct network control and management in some sections during certain periods of time and adjust or disable certain network access ports (including securities, BT, Thunder, games, etc.) without prior notice.

Appendix 5 Notice to Exhibitors with Standard Booths

1. The official constructors of the Expo will be in charge of the set-up of standard booths.
2. Exhibitors with standard booths shall fill in the lintels of their booths with information consistent with the information on their signed contracts and return them to the Expo's official constructors before September 25th, 2021. Without the Organizers' permission, they shall not cover or change their lintels.
3. All applications for water, electricity, gas, network and telephone service shall be submitted to the CIIE's official constructors; the CIIE's official constructors shall be in charge of the installation, wiring and demolition of all the facilities for rent; before the power is switched on, all electric facilities and appliances shall be tested by professionals, and pass the tests.
4. If any exhibitor intends to rent exhibition equipment or plants, an application shall be submitted to the CIIE's official constructors before September 25th, 2021. On-site applications may not be available.
5. Without permission, exhibitors shall not tamper with the structure of their booths, or taint or damage the structure or accessories of the booths, including nailing, drilling and pasting wallpapers. For any assistance needed for hanging or arranging exhibits, please contact the Expo's official constructors.
6. No promotional materials shall be hung or pasted on the columns or walls of the venue.
7. Exhibits and exhibition equipment shall not overstep the boundaries of booths or occupy public area.
8. No objects shall be stacked on wires or circuit boxes; objects, materials and others inside the booths shall be properly kept in accordance with regulations and at a safe distance from wires and other dangerous objects.
9. It is prohibited to connect wires or lighting devices without permission. In case of any trip, short circuit, wires catching fire, circuit box damage, etc. for any exhibitor's improper operation, the exhibitor shall take responsibility and compensate for the losses.
10. Organizers or the venue are entitled to take appropriate measures against potentially dangerous equipment and facilities, including power cutoff.
11. The sockets inside standard booths are exclusively used for television, computer, water cooler and other electrical appliances with rated power below 600W, rather than exhibition equipment or lighting devices. Exhibitors that intend to bring their own lighting devices shall apply for additional lighting power; for exhibition equipment or machinery that requires electricity, exhibitors shall apply for additional engine power; application for lighting power and that for engine power shall be independent of each other; one socket can only be used for one equipment facility or machine. Multiphase sockets are forbidden to prevent short circuit caused by overload.
12. Every booth shall have its power switched off at the end of each day's exhibition. Exhibitors shall bear all losses and liabilities caused by failure to do so.
13. The power at the venue will be cut off at the closing time every day. Exhibitors in need of power, water or gas supply around the clock shall submit the applications in advance to the official constructors to prevent any damage to their equipment due to power outage.
14. For transport procedures and costs and other matters, please refer to the Exhibit Transport in this manual or consult the CIIE's official forwarders.

SYMA was founded in 1961 in Switzerland, which is the first company to introduce the booth made of "modular" aluminum – with simple aluminum to create varieties of booth designs. At the same time, SYMA has been working hard to find sustainable solutions, manage and develop flexible and reusable new aluminum exhibition materials, reduce the amount of waste generated in the construction phase, and select recyclable materials as far as possible. Shanghai SYMA-Expo LTD was established on July 13, 1993. Its main business scope is exhibition engineering design, production, craft decoration, conference service, exhibition service, corporate image planning and providing exhibition equipment leasing, exhibition equipment processing, and sales of the company's own products. The first China international import expo, which attracted worldwide attention, was successfully held at National Exhibition and Convention Center (shanghai) from November 5 to 10, 2018. Shanghai SYMA participates in actively and is honored to be one of the designated builders. In order to hold the fair smoothly, Shanghai SYMA set up a special team for the fair with more than 340 days hard work and concerted efforts. Relying on the world's leading creative team, sophisticated professional building technology and quality service, we have undertaken the design, construction, exhibition arrangement, operation and maintenance work of more than ten booths including the national pavilion and enterprise pavilion of import expo using our regional advantages and abundant customer resources. Our service covers automobile transportation, medical and health care, financial services, engineering and construction industry, and many other fields.

Shanghai Yiyue Exhibition Co., Ltd., formerly known as the Exhibition Department of Shanghai Medical Device Industry (Group) Co., Ltd., was established in 1992. Since the first session of China International Medical Device Expo, it has been one of the main exhibition design and production enterprises. It has also been awarded the second level enterprise qualification of the first batch of Shanghai Exhibition Engineering Enterprises by Shanghai Convention and Exhibition Industry Association. The company has 500 square meters warehouse storage standard booth, nearly 1000 sets of aluminum profiles, other kinds of props, electrical materials, etc., and more than 13000 square meters of production site. The factory passed the "integrated wastewater discharge standard", "integrated air pollutant discharge standard" and "industrial enterprise boundary environmental noise discharge standard". Mainly engaged in exhibition, exhibition hall, commercial space and all kinds of new aluminum booth design and construction and related planning, service business. The core business of the company is the design and construction of the exhibition group of China International Medical Device Expo (spring and Autumn), the construction of the booth and venue of China International Trade Fair, China International Industry Expo, auto show and other large-scale exhibitions, as well as the layout and construction of several domestic spring and Autumn Auctions. In 2019, I have the honor to participate in the design and construction of the second Import Expo, and won the "green booth Bronze Award" of the second China International Import Expo and the "contribution award of service to the Expo" of Shanghai Convention and Exhibition Industry Association.

AMBROSIOUS, started in Frankfurt, Germany in 1872, is one of the leading internationally renowned suppliers in the exhibition construction industry. Ambrosius China, settled in Shanghai in 2004, has also become a very powerful and excellent brand in the past two decades, with the vigorous development of China's exhibition industry. Inheriting the high-quality tradition of Germany, Ambrosius China is well-known for its "high-quality and professionalism". It has continued to serve high-end automobile manufacturers such as Mercedes-Benz, Maserati, and Volvo for years. It is recently winning the good reputation among chemical industry giants, such as Schaeffler, LANXESS, Pirelli and so on. "German quality, made in China" was, is and is to be the implementation philosophy of Ambrosius China.

Company profile: Jinju is a professional exhibition engineering company which is devoted to exhibition booth design, brand communication and architectural decoration both in China and abroad. The operation principle of Jinju is "enhancing the brands of client and our own company at the same time". After years of hard working, Jinju successfully ranks among the most competitive exhibition companies.

Appointed and Recommended by Exhibition as Follows

- Shanghai EXPO
 - China International Medical Equipment Fair (CMEF)
 - China International Battery Fair (CIBF)
 - China International Pharmaceutical Machinery Exposition (CIPM)
 - Shanghai International Petrochemical Offshore Oil & Gas and Chemical Industry Technology and Equipment Exhibition (CIPPE)
- Dozens of large exhibitions in China

Guangzhou Hua Yi Exhibition Design Co., Ltd. was established in 2004, with a registered capital of RMB8 million. It has passed the qualification of Class-A license of China Exhibition Center Association, the national ISO9001 quality management system certification, the national ISO14001 environmental management system certification, and the Canton Fair designation Build business qualifications. With double structure to build quality, it focuses on the exhibition design and construction services. It has 390 square meters of independent office space, 8,000 square meters of production and warehousing exclusive factory (Baiyun District), and 5000 square meters of supporting factories in Beijing, Shanghai, and Chengdu. It has a senior three-dimensional designers and nearly 40 graphic designers, 20 structural engineers, 18 project managers, and more than 160 customer service and administrative, financial, logistics and factory workers of various types. In respect of construction: it has well-equipped modern factories and experienced engineers and technicians, EEDON from Germany and the special lift Lancaster special aluminum alloy scaffolding and other special tools, specifications and a full range of lighting equipment and exhibition equipment. The company serves all levels of government departments, leading brands in various fields, focusing on the government and brand customers comprehensive service capabilities to ensure continuity and professional customer marketing services for many large domestic and foreign enterprises and government agencies Construction booth construction and planning, by many large-scale exhibition designated as the designated contractor at home, has created remarkable performance. Over the years, the company has adhered to the "Founding, integrity first, the pursuit of excellence" business philosophy, "service quality achievements" as the dominant philosophy, adhere to the professional and branded development road, been devoted to providing customers with a full range of services. Hua Yi has win praises from domestic and foreign institutions and enterprises with the most reasonable price, unique design concept, and thoughtful service.

Appendix 7 Notice to Exhibitors with Special Booths

1. Special Booths

The exhibitors first rent the raw space (minimum 36m² for leasing) for China International Import Expo (CIIE), and then, for special booths, entrust the special construction companies recommended or approved by the Organizers to use different materials from the standard booths for their complex decoration.

2. Construction Companies for Special Booths

- 2.1 During the move-in, exhibition period and move-out, all matters related to booth set-up, dismantling and maintenance during the CIIE shall be carried out in compliance with the rules and requirements by the Organizers, including Exhibitor's Manual, Pre-Show Notification, Move-in Instructions, Safety Instructions, Venue Notices and User's Manual for Exhibition Halls in the National Exhibition and Convention Center (Shanghai), Security Management Standards for Facilities Built in NECC. Furthermore, the exhibitors, constructors and service providers shall actively cooperate with the Chinese government departments and the Organizers with respect to the supervision, inspection and management.
- 2.2 Any agreement or arrangement by the exhibitor and the special construction company is purely a contract between the two parties. If any accidents or disputes occur, the two parties shall resolve them by legal means and the Organizers shall not bear any liability.

3. Application for Special Booth Set-up

3.1 Application Content

A special booth application form and related materials shall be submitted to the official constructors of the exhibition area. For double-storey special booths and single-storey ones with a height of 4.5m (including 4.5m), relevant materials shall be submitted to the drawing inspectors for height-based structural inspection. Please refer to 4.4 "Drawing Inspection" in Part III: Booth Design and Set-up of the Exhibitor Manual for further details.

3.2 Drawing Inspection Process

- 1) The official constructors or drawing inspectors will review the application materials submitted by the special construction companies within 5 days.
- 2) For the drawings having not passed the review, the special construction company shall, within 5 days after receiving the modification opinions from the official constructors or drawing inspectors, re-submit the application according to the rectification requirements.
- 3) Having completed the review, the official constructors and drawing inspectors will promptly notify the application company that the drawing approval fee for the booth at a height of 4.5m or more will be collected by the drawing inspectors.

4. Relevant Requirements for Special Booths

4.1 Relevant Requirements for Single-storey Special Booths

- 1) The booth design and installation height is 6m, and its vertical orthographic projection shall not exceed the scope of leased raw space.
- 2) The booth structure shall be designed to be stable and safe and be distributed reasonably so as to avoid accidents such as casualties and property losses caused by the collapse of the booth.

4.2 Relevant Requirements for Double-storey Special Booths

- 1) The booth design and installation height shall not exceed 8.5m.
- 2) The sum of the dead load and the live load for the designed booth shall not exceed the approved bearing value of the exhibition venue.
- 3) The booth structure shall be designed to be stable and safe so as to avoid accidents such as casualties and property losses caused by the collapse of the booth.
- 4) If the structure of a back-to-back booth is higher than that of the booth of the other party, the higher structure constructor shall beautify the height-based structure and also print the logo of CIIE; if the constructor refuses to beautify it, the Organizers have the right to take measures for compulsory enforcement. All resulting costs and responsibilities shall be solely borne by the constructor entrusted by the exhibitor of the booth.

4.3 Relevant Height Limit Requirements for Special Booths in the Main Aisle

Only single-storey booths are allowed to be built in the main aisle of the exhibition hall, with a limited height of 6 meters (including the lifting point); the height limit in other areas remains unchanged.

4.4 Relevant Non-sheltered Requirements for Special Booths in the Main Aisle

In principle, two sides of the booth in the main aisle must be open and unobstructed, not obstructing the sight of adjacent booths on the same visual surface. The construction structure shall not exceed 1/2 of the booth depth.

4.5 If there is a venue structure column in a booth, the beautification height of the structure column shall not be higher than the height of the booth, and fixed facilities on the structure column, such as manual fire alarms, shall be exposed.

5. Safety Guidelines on Special Booth Structure

The strength of the special booth structure shall meet the requirements by the load, and the overall strength, stiffness, stability and firmness of the joints of the booth structure shall be guaranteed. Specifically,

5.1 General Requirements (applicable to both single-storey special booths and double-storey ones)

- 1) The ground width of the main wall of the booth structure shall not be less than 120mm to ensure the contact area between the wall and the ground; for the large-span wall body and the steel frame structure exceeding 6m, the crossbeam between them shall be connected at the top, and the lower part shall be provided with column support.
- 2) All special booths with crossbeams connected at the top shall provide detailed structural drawings, and the structural strength shall satisfy the requirements by the load. Crossbeams shall be in steel structure and firmly attached. Bolts or other security fixing materials shall be used for the connection of columns and beams. Connections such as lapping, banding, etc. are prohibited.

- 3) For the decoration of booths using glass materials, qualified tempered glass shall be adopted, and please ensure the glass strength and thickness (thickness of the curtain wall glass is not less than 10mm); glass installation method should be reasonable and reliable, using metal frames and professional hardware. Elastic materials should be used as the cushion between the frame, the hardware and the glass material in order to ensure the safety of the glass; large-area glass materials should be clearly marked to prevent crushing and injuring people. If a glass platform is used, the structural support column and wall shall be fixed under the platform, and the booth structure constructed directly above the smooth glass surface is prohibited.
- 4) Steel structure pillars shall be made of non-welded material with a diameter of more than 100mm. The bottom is welded to the chassis, and the upper part to flange so as to increase the bearing area of the pillars.

5.2 Special Requirements for Double-storey Booths

- 1) Booth structural drawings are needed for double-storey booth set-up. Besides, it is also necessary to offer materials as follows:
 - I. Distribution diagram (specify the types of lamps, sockets and total control switch box, the installation location, and the specific installation method);
 - II. Pillar and beam structure chart for two-storey booths (specify static load technical data and live load technical data).
- 2) The double-storey special booths shall be constructed with materials in steel structure and reinforcement processing accordingly. In particular, the load-bearing structure shall be constructed of steel and be well grounded.
- 3) The foundation of the pillar and beam for double-storey special booths should be connected with ground beam and reinforced with high-strength screws. Moreover, hard rubber non-slip pads should be added to the ground contact surface as well to prevent translation.
- 4) The escalator guard railings of the double-storey special booth shall not be less than 1.2m. The railings should be made into curved surfaces so as to prevent objects from slipping off them.
- 5) The capacity of the upper area of the double-storey special booth shall not be less than 400kg/m², and the upper area shall be used only for business negotiation or rest purposes. The main purpose of placing exhibits shall not be permitted, and the number of people staying in the upper area shall be strictly controlled.

6. Construction Management Agreement

- 6.1 The construction will be carried out according to the preparation time in Exhibitor Manual. If overtime construction is required, an application shall be made in advance.
- 6.2 The construction shall be conducted in strict compliance with the booth design drawings that have passed the inspection, and do not change them without permission from the drawing inspectors.
- 6.3 The construction area shall exceed the specified scope.
- 6.4 The materials used in the booth set-up should be non-combustible or flame-retardant. Grass, bamboo, rattan, paper, bark, foam, reeds, flammable plastic panels, flammable carpets, fabrics, and wood planks should not be used as decoration materials. If it is absolutely necessary to use combustible or inflammable materials for special reasons, prior written consent from the Organizers shall be obtained, and fire prevention measures deemed appropriate by the Organizers shall be adopted. These materials shall not be used until acceptance by the Organizers.

- 6.5 It is forbidden to use cutting machines, electric saws, spray paints, and inflammable materials like lacquer thinner, alcohol, and instant stickers on the construction site
- 6.6 Welding (electric welding and gas welding) and operation with naked fire are forbidden at the venue.
- 6.7 No fixed facilities within or near the booth shall be damaged or changed, or any fixed facilities in the exhibition hall shall be used for fixing or hanging. No decoration or hanging shall be allowed on the ceiling above the booth.
- 6.8 If there are facilities such as fire-fighting, power supply, and communication facilities within or near the booth, they shall not be blocked during construction, and a safe or operable distance of minimum 60cm shall be maintained, and also instructions shall be affixed at an appropriate position on the booth.
- 6.9 No pressing on the distribution box for the underground well in the exhibition hall. It is obligatory to reserve at least one movable inspection opening larger than the size of the distribution box cover when it is absolutely necessary to make special arrangements on the top of the distribution box, to ensure that the distribution box cover can be smoothly opened and to facilitate fault handling.
- 6.10 In principle, the ceiling area of a single-storey booth shall not be larger than 160m², and capping for double-storey booths is strongly prohibited. If it is absolutely necessary to break the rules for special reasons, prior written consent from the fire safety department shall be obtained before the construction and safety measures deemed appropriate by the fire safety department shall be adopted.
- 6.11 The exhibition part on the back or side of the booth should be treated with double-finish beautification. No advertising or publicity content shall be contained on the exterior.
- 6.12 The temporary use of power during construction shall be conducted under the provisions of temporary power use.
- 6.13 The staff from the CIIE security department, professional electricians and the personnel from Shanghai Fire Department of Ministry of Public Security shall supervise and inspect all booths construction in accordance with the fire approval and the relevant provisions in this part and also Exhibitor's Manual. Construction companies shall consciously and cooperatively accept inspection, and promptly make rectifications as per the requirements put forward by the inspectors in case of unqualified safety requirements or hidden safety problems.
- 6.14 All construction tools and materials shall not be placed within or in the back (side) space of the booth, and shall be cleared out of the exhibition hall before its closing time after completed.
- 6.15 Green construction shall be fully implemented, and green booths shall be 100% popularized, as per the relevant requirements and provisions of the Organizers.

Appendix 8 Criteria for Green China International Import Expo

These Criteria specify the requirements for green booths, green operations, green logistics, and green catering of China International Import Expo (CIIE). The specific standards are as follows:

1. Criteria for Green Booths

“6R Concept” will be followed throughout the whole process.

Respect:

The notion of respect for nature and similar thinking shall be valued. The CIIE's negative impact on the environment shall be reduced to the greatest extent, including its impact on venues and people, and reduce excessive use of resources and energy.

Renew (utilization of renewable materials and new materials):

Renewable materials shall be utilized as far as possible in CIIE related construction, and the utilization of new materials, new products and new technologies is encouraged.

Reuse and Recycle (reusable and recyclable materials):

Reusable and recyclable materials shall be utilized as far as possible in construction.

Reduce (reduce waste and pollutants):

The adverse impact of construction of booths on the environment shall be reduced, through reduction in utilization of substances harmful to human health, and through utilization of harmless and energy-efficient materials, to reduce pollution and waste.

Remember (deepen impression and strengthen education):

The plan is to communicate the philosophy of sustainable development to CIIE's participants. The aim is to help enterprises and individuals participating in the CIIE to implement the concept of sustainable development, and increase their awareness of environmental protection through education, during the course of the CIIE.

1.1 Green Design

- 1) Simplified design: This means simplifying the spatial layout of booths and the dimensional design of partitions, instead of pursuing magnificent and luxurious decoration, and placing emphasis on detailed changes in texture and color, to move towards simplicity, and save materials and labor.
- 2) Recyclable display design: Long-term and stable recycling shall be implemented by providing distinctive visual image identification system design unique to an exhibitor, and dedicated standard display furniture and reusable display systems for the enterprise shall be designed, which can not only create a uniform corporate image but also represent the connotation of a modern green enterprise.

- 3) Utilization of eco-friendly materials in design: Materials to be used in display design must be environmentally friendly, and should include natural materials, man-made biodegradable materials, and purified recycled and reclaimed materials.
- 4) Removable furniture design: The furniture shall be removable and easy to transport, and it should not be difficult to assemble or disassemble the furniture.
- 5) Modular-based design: Design companies will, keeping in mind removable furniture, design different styles of assembly modules for customers to choose from, or modify or restructure original design based on different exhibition environment, the exhibition hall area and cost range, to provide quickest service, improve efficiency and save the work at the preliminary stage.
- 6) Safety design: All design must pass the safety review concerning fire protection, structure and electricity supply for CIIIE.
- 7) Other design: It is advisable that design companies refer to bionic design elements, green landscape design and include elements of an emotional experience in their design. All design companies should be committed to green design, and possess a strong sense of social responsibility and a sense of innovation.

***Note:** The maximum height of single-story booths is 6 m and that of two-story booths is 8.5 m.

1.2 Green Material Selection

- 1) Materials for setup of booths should be reclaimed environmentally friendly or reclaimable materials that are recyclable, non-toxic and harmless, and meet standards A or B:
 - A. All metal profile structure:** Decorative materials are less than 10% of the total building materials (calculated based on volume) and are all non-wood. The reclamation rate of the building materials should be 100%.
 - B. Mixed profile structure:** Wood materials used are lower than 30% of the total building materials (calculated based on volume). The reclamation rate of building materials should be 100%.
- 2) Lightweight, possess high detachability, should not be difficult to assemble or disassemble, and easy to transport.
- 3) 80% or more of the lamps used should be energy-saving ones.
- 4) Specific instructions on single-story green booths
 - I. A. All metal profile structure: There is no wood material in the entire main body structure of the booth; B. Mixed profile structure: The main body structure can be made of wood material on one side, and slot board or PVC panels.
 - II. Wood materials used for the floor deck that is modular and assembled on site are not included in the 30% wood materials.
 - III. Materials like punched metal plate and suspended mesh can be used for setup of booths.
 - IV. It is recommended to use movable display cases (separate from the main body structure) for a booth on the precondition that it doesn't affect safety of the structure, and it does not increase the height through stacking. Independent floor cabinets that are not constructed on site at the exhibition hall are not included in the 30% wood materials.
 - V. It is not permitted to create the fascia board for the booth using wood materials. A profile can be used for the frame structure, and organic glass or a cloth lamp box can be used as exterior decoration.
- 5) Specific instructions on double-story green booths
 - I. On the premise that structural safety requirement can be met, the back plate on two sides of the first-floor's main body structure can be made up of steel or iron profiles plus wood plate (including PVC panel). The other two sides and the four sides of the second story (including the room) should be constructed with non-wood materials.

- II. The wood materials used for the first and second-story floor deck that is modular and assembled on site are not included in the 30% wood materials.
 - III. Materials like punched metal plate and suspended mesh can be used for setup of booths.
 - IV. It is recommended to use movable display cases (separate from the main body structure) for a booth on the precondition that it doesn't affect safety of the structure, and it does not increase the height through stacking. Independent floor cabinets that are not constructed on site at the exhibition hall are not included in the 30% wood materials.
 - V. It is not permitted to create the fascia board for the booth using wood materials. A profile can be used for the frame structure, and organic glass or a cloth lamp box can be used as exterior decoration.
- 6) When structural base materials (including but not limited to laminated wood board, density fiberboard and wood veneer) and decorative surface materials (including but not limited to fireproof board and aluminum-plastic composite plate) are chosen for constructing the booths, the formaldehyde emission from the wood materials selected should be $\leq 9\text{mg}/100\text{g}$ using the perforator method; paint without formaldehyde, benzene and other volatile organic compounds (VOCs) should be selected; the adhesive agent used during construction must meet environment protection standards.

1.3 Green and Safe Construction

- 1) On-site assembly should be modular and use individual pieces for assembly, and construction and disassembly should be conducted in an orderly, controllable, convenient and safe manner.
- 2) The people, exhibition venues, equipment and facilities shall not be damaged.
- 3) No dust should be spread across a large area at the construction site, and it is required to control the spread of dust spread within the booth; construction noise shall not exceed 75 decibels; sanding, paint rolling or spraying paint are prohibited at the construction site, and it is not permitted to use cutting machines or electric saws.
- 4) No actions shall be conducted that violate construction regulations at the construction site.

2. Criteria for Green Operations

2.1 No Pollution at the Exhibition Areas

- 1) Light pollution: Lighting for the booth should be properly installed to prevent excessive light radiation causing an adverse impact on people and the environment.
- 2) Noise pollution: The maximum sound volume of the display exhibit equipment at the booth is 70 decibels; it is permitted to exceed the upper limit by 10-20 decibels for a short duration of time; in case of special performances approved by the Organizers, it is permitted to exceed the upper limit by 20 decibels for a short duration of time. In addition, the Organizers have the right to stipulate the period and duration for display of exhibits based on the specific situation of a booth.
- 3) Waste gas pollution: The discharge of toxic and harmful gases from exhibits or other articles is strictly prohibited.
- 4) Visual pollution: Publicity and promotional activities should be conducted in a civilized and eco-friendly manner, and all publicity materials should have an electronic version. Exhibitors should conduct publicity mainly through electronic channels such as LED displays, mobile devices and QR codes, and print versions should be used as supplements. No more than 500 pieces of printed publicity materials shall be released each day. Any other visual environmental pollution is prohibited.
- 5) Solid waste pollution: All solid waste should be fully segregated and treated as per their category, in a pollution-free manner.

2.2 Green Office

Based on the principle of waste minimization and recycling and reuse of resources, office supplies that are recyclable and made from renewable materials, with simple packaging should be chosen; waterless printing and VOC-free printing ink should be used; two-sided printing and photocopying should be preferred; environment-friendly furniture should be used for the office at the booth; and electricity should be cut off when the exhibition hall is closed, to reduce energy consumption.

2.3 Green Commuting

The CIIIE advocates the use of “green, low-carbon and civilized” commuting means. Principle of proximity should be considered while selecting a meeting venue, hotel for accommodation and dining hall. It is suggested that public transportation vehicles including buses and subway, car-sharing and environmentally-efficient driving modes should be chosen for commuting; the use of bicycles or walking to cover short distances is suggested.

2.4 Green Services

The Organizers will comprehensively consolidate resources and by focusing on improving the experience of exhibitors, provide top-class internationalized and professionalized services in a fast, efficient, and energy-efficient manner. These will cover the activities before, during and after the exhibition through proper planning of the exhibition, set up of one-stop special service areas with extensive functions, and adherence to high-efficiency management standards.

3. Criteria for Green Logistics

In addition to controlling damage to the environment caused by logistics, the logistics area shall be cleaned regularly, and logistics resources shall be made full use of. Each exhibitor and official forwarders shall comply with criteria for green logistics.

3.1 Green Transportation

Green modes of transportation shall be used. It is required that transportation means that use clean fuel and can save energy and reduce emissions are utilized; short-distance allocation of cargo and night transportation should be chosen as far as possible to avoid traffic jams; transportation routes should be reasonably arranged so as to avoid driving with excessive load, unnecessary long-haul transportation and repeated transportation.

3.2 Green Warehouse

The location of the warehouse shall be reasonably determined, the warehouse space shall be effectively utilized, transportation efficiency shall be improved, transport distance shall be reduced, transportation costs shall be reduced, and the impact of warehouse operations on the environment of the place where it is located shall be fully considered.

3.3 Green Packaging

Packaging used shall be non-toxic and free from side effects; emphasis shall be placed on reducing packaging, and ensuring that packaging is easy to remove, renewable and recyclable, and can protect goods effectively, so as to save resources and reduce discharge of waste.

3.4 Smart Logistics

Through intelligent technologies such as intelligent hardware, Internet of Things, and big data, the ability of logistics system analysis and decision-making and intelligent implementation will be improved, and the level of intelligence and automation for the entire logistics system will also be promoted, thereby reducing social costs, increasing production efficiency, and integrating society resources.

4. Criteria for Green Catering

Throughout the entire process of CIIE, all catering service providers concerned must conduct business pursuant to applicable laws, including the Food Hygiene Law of the People's Republic of China. It is necessary to ensure green food production and provision of services by adhering to the notion of safety, health and environment friendliness.

4.1 Green Procurement

Raw food materials purchased must be safe, environmentally-friendly, and healthy. Materials must be sourced from legitimate and safe sources; it is necessary for an enterprise to determine the quantity and stock level of materials according to its production and operation scale; it is not permitted to purchase wild animals to attract customers, and each catering enterprise must recognize its responsibility and obligation in the protection of wild animals.

4.2 Green Production

The nutrition and hygiene of food must be guaranteed in its production method, and it is required to use green technologies for organizing and conducting production; the technologies and equipment utilized should be energy and water-saving and conducive to environmental protection. The use of consumer goods that waste resources and pollute the environment should be minimized or avoided completely; it is required to use clean technology for production, water usage, electricity and gas in a centralized manner to reduce energy consumption, and sewage, waste gases and garbage shall be treated properly so as to meet the discharge standard.

4.3 Provision of Green Food Services

It is required to use disposable dishware and drinkware that is biodegradable, light-degradable and made from easily recycled materials, and it is not permitted to use disposable dinnerware made of plastic foam. When a customer orders dishes, the waiter should recommend food on the principle of "economy, reasonable collocation and waste minimization", and recommend green and healthy foods and drinks as far as possible; the consumption environment provided should be tidy, quiet and elegant; the restaurants should be decorated using environment-friendly and pollution-free materials, and should have lively and coordinated colors; there should be fresh air and pleasant temperature in each restaurant; the staff's attire should be tidy and formal; the staff should use appropriate means to avoid touching the food directly.

5. Each exhibitor having a special booth at the enterprise & business exhibition, and the organizing institution of the country holding national exhibition must fill in the Green Special Booth Assessment Form (see Appendix for details) and submit it along with drawings to the corresponding official constructors and drawing inspectors. Official constructors and drawing inspectors are responsible for reviewing the design of every special booth and have the right to reject a booth design plan that does not satisfy these green Criteria.
6. These Criteria are established for the purpose of CIIE, and CIIE holds the sole rights for interpretation.
7. These Criteria are implemented as of the first China International Import Expo 2018.

Annex: Green Special Booth Assessment Form

Implementation Stages	Category	Are Green Criteria Met?		Is it Consistent with Service Provider's Review?		Remarks
		Yes	No	Yes	No	
Design	Simplified design					
	Recyclable display design					
	Environment-friendly material utilization design					
	Removable exhibition equipment design					
	Modular design					
	Booth material					
	Component-based modules					
	Orderly and controllable					
Construction (Move-in and move-out)	No dust					
	No noise					
	No toxic discharge					
	Safe on-site construction					
	Construction based on drawings					
Are All Green Criteria Met						

- Notes:
1. Please check the corresponding box with “√”.
 2. If any of the above items fails to meet the Criteria, the booth will be deemed as a non-green booth.
 3. The design stage will be checked by the official constructors and drawing inspectors; the construction stage will be jointly supervised by the official constructors, drawing inspectors and the on-site property management company.
 4. All summary statements of booths' design assessment will be provided by service providers to the Organizers before the exhibition.

Appendix 9 Four Leaf Clover Cup China International Import Expo Green Booth Awards Selection Criteria

1. General Provisions

- 1.1 These Selection Criteria are formulated to facilitate a green China International Import Expo (CIIE), guide the design, construction and operation of special booths at CIIE towards a green and environment-friendly approach, and raise the overall level of CIIE.
- 1.2 The CIIE will follow the selection criteria of green, ecology, innovation, safety and aesthetics, and reflect the selection principles of transparency, fairness and impartiality.
- 1.3 These Selection Criteria apply to the exhibitors participating at the CIIE and special booth constructors.
- 1.4 The selection will be planned, organized and implemented by CIIE and the National Exhibition and Convention Center (Shanghai).

2. Awards

- 2.1 The CIIE Green Booth Awards for Enterprise & Business Exhibition area include one Gold Award, three Silver Awards and five Bronze Awards. All these awards will be given to the exhibitors and the special constructors of winning booths.
- 2.2 The CIIE Green Booth Awards for Country Exhibition area include one Gold Award, two Silver Awards and three Bronze Awards. All these awards will be solely given to the special constructors of winning booths.

3. Eligibility

- 3.1 Independent special booths with a booth area above 36 m² (inclusive).
- 3.2 Candidate companies shall not have been blacklisted by CIIE.
- 3.3 Candidate booths shall not be involved in any violation of rules or regulations in the process of booth set-up, operation and dismantling.
- 3.4 No products infringing upon the intellectual property rights of others shall be exhibited at candidate booths, and exhibitors shall not infringe upon the intellectual property rights of others during exhibition.
- 3.5 Any design given the CIIE Green Booth Award will be ineligible to be nominated for the next three sessions of the CIIE.
- 3.6 If one exhibitor has several highly similar designs, only one of them may be submitted for nomination during the same CIIE, for which the Organizers have the right of final decision.

4. Selection Criteria

4.1 Selection criteria for CIIE Green Booth Awards:

- 1) Planning & Design: (30%)
 - I. Fully reflect the concepts of green, ecology and sustainability.
 - II. Organically integrate the culture and the exhibits of the participating countries/ the exhibitors.
 - III. Simple, innovative, creative and great sense of design.

- 2) Material Selection & Set-up: (30%)
 - I. Follow the 6R concept and use renewable, recoverable and recyclable environment-friendly materials.
 - II. Highlight the use of materials specially used for the exhibition.
 - III. Fine craftsmanship, and scientific booth set-up.
 - IV. Lawful and standardized set-up and dismantling, emphasis on safety, order and efficiency.
- 3) Booth Effect: (40%)
 - I. Highlight the image and the brand of the country/ the company.
 - II. Highlight the theme of exhibits and the key exhibits.
 - III. Diversified and novel exhibition means.
 - IV. Reasonable layout for the interior route of the booth.
 - V. Fully functional display and negotiation.

5. Selection Process

5.1 Application

- 1) Applicants:
 - I. Eligible participating countries/exhibitors who voluntarily apply.
 - II. Exhibitors recommended by the Organizers.
- 2) How to apply: Participating countries/ exhibitors or special booth constructors entrusted by them are required to submit a CIIE Green Booth Awards Application Form online and explain the planning & design, material selection & set-up and booth effect in writing (in both Chinese and English) along with a design rendering of the booth.
- 3) Application deadline: Prior to October 20, 2021.

5.2 Preliminary Assessment

The assessment panel will make a preliminary assessment according to the application materials and score based on the scoring criteria. The entries will be determined based on the final score. The assessment panel will then conduct on-site inspection to determine if the booths meet the CIIE green special booth standards.

5.3 Re-assessment

- 1) The assessment panel will conduct a comprehensive assessment of the entries on the spot and determine the list of nominees of the CIIE Green Booth Awards.
- 2) On-site inspection during move-out. The assessment panel will inspect the nominated booths at the site during move-out. In case of lack of safe construction or failure to recycle all set-up materials during move-out, the nomination will be revoked, and the vacancy will be filled by the next eligible applicant.

5.4 Approval, Publicity and Announcement

- 1) Approval: The final nominee list will be submitted to China International Import Expo Bureau for approval after the closing ceremony.
- 2) Publicity: The winning booths will be publicized on the website of CIIE in 5 working days.
- 3) Announcement: The winner list will be submitted to the preparatory committee of CIIE, reported to the exhibition invitation service providers and announced on the official website and other official channels of CIIE under the name of China International Import Expo Bureau.

6. Incentives

6.1 Companies and special constructors of winning booths will be given the following incentives:

- 1) Winning exhibitors will be given priority in booth reservation and location arrangement for the next CIIE under the same conditions.
- 2) Exhibitors and special constructors of winning booths will be granted CIIE Green Booth Awards, and the awards will be presented at the next CIIE.
- 3) Winning booths will be publicized on the website or other official channels of CIIE. Furthermore, they will also be publicized at a conspicuous place on the LED screen in the exhibition hall at the next CIIE for three days. The publicity content mainly includes the profile of the exhibitor of the winning booth, the special constructor name and the booth photos.
 - I. Gold Award: publicity for 120 seconds/day.
 - II. Silver Award: publicity for 60 seconds/day.
 - III. Bronze Award: publicity for 30 seconds/day.

6.2 In principle, an exhibitor may not win more than two awards at each CIIE.

7. Responsibilities

- 7.1 The Organizers and exhibition invitation service providers shall publicize and promote the award to exhibitors and organize exhibitors to actively participate in the awards.
- 7.2 The Organizers shall be responsible for putting in place the incentives for the winning exhibitors.
- 7.3 China International Import Expo Bureau and National Exhibition and Convention Center (Shanghai) shall be responsible for leading the organization work to make sure the selection is transparent, fair and impartial, form the assessment panel, publicize and promote the selection, put in place the incentives for the winning designers and special booth constructors, and lead the revision of selection criteria.

8. Supplementary Provisions

- 8.1 These Selection Criteria are established for the purpose of CIIE, and CIIE holds the sole rights for their interpretation.
- 8.2 These Selection Criteria shall take effect as of the first CIIE.

Annex: 1. CIIE Green Booth Awards Application Form
2. CIIE Green Booth Scoring Criteria
3. CIIE Green Booth Awards Selection Process

Annex 1: CII Green Booth Awards Application Form

Date of Application:

Booth No.		Session	(the 4 th session)	Category	(Exhibition area)

	4. Lawful and standardized set-up and dismantling, emphasis on safety, order and efficiency.	9	
Booth Effect (40%)	1. Highlight the country/ the corporate image and brand	10	
	2. Highlight the theme of exhibits and the key exhibits	8	
	3. Diversified and novel exhibition means	7	
	4. Reasonable layout for the interior route of the booth.	8	
	5. Fully functional display and negotiation	7	
Total		100	

Annex 3: CIIE Green Booth Awards Selection Process

Appendix 10 Procedure of Issuing the Certificate of Exhibition

In order to facilitate the exhibitors of the China International Import Expo (the CIIE) in a grace period of six months without loss of primary exposure when applying for patents in China for newly exhibited inventions, and to ensure priority in applying for trademark registration in China for trademarks on exhibited goods (or services) used for the first time, the organizer of the CIIE (hereafter referred to as the Organizer), after reviewing the written applications submitted by exhibitors, will issue the Certificate of Exhibition for relevant eligible exhibits and trademarks exhibited at the CIIE .

1. Applicants

Exhibitors whose exhibits are shown for the first time at the CIIE without patent applications submitted in China, and exhibitors whose trademarks of goods are used for the first time at the CIIE have the right to apply for the Certificate of Exhibition.

2. Application Procedures

- 2.1 Time: November 5th - November 10th, 2021 (from 9:00am to 5:00pm).
- 2.2 Location: The Service Center for IPR Protection and Commercial Dispute Resolution (hereinafter referred to as the "Service Center").
- 2.3 Materials required
 - 1) The Application Form for the Certificate of Exhibition (including an appendix of the Description of Exhibit / Description of Trademark) (in triplicate) completed, signed and stamped by the applicant.
 - 2) The copy of the qualification certificate of the main body of the exhibitor (one copy) which must be signed by the applicant and stamped with an official seal.
 - 3) For entrusted application, the original copy of the power of attorney, and a copy of the identity certificate of the trustee (one copy) must be provided.
 - 4) Other relevant supporting materials.
 - 5) All the above materials must be submitted as hard copies, and the Service Center will not accept electronic documents.
- 2.4 Procedures:
 - 1) The applicant should submit materials in hard copy on site at the Service Center.
 - 2) After the Service Center reviews the materials and confirms that the materials meet the requirements, two or more staff members will conduct site visits and fill out a Registration Form for Site Visits.
 - 3) If the demonstration is verified, an Acceptance Receipt will be issued. Otherwise, the Service Center will return all application materials.
 - 4) The Organizer will issue the Certificate of Exhibition within 15 days after the conclusion of the CIIE to the applicants who have received the Acceptance Receipt, which will be provided to the applicants by regular mail

3. Relevant Matters

- 3.1 All documents and materials must be made in Chinese. For documents in foreign languages, Chinese versions with an official seal of a translation agency with relevant translation qualifications should be provided as a complete set. The applicant must guarantee the accuracy of the Chinese translation.
- 3.2 The Service Center will regard the time of site visit as the exhibition time of the exhibit and trademark on CIIE.
- 3.3 The Service Center only accepts the applications submitted on site during the application time.
- 3.4 The applicant should retain all documents and materials collected, collated and obtained as a result of their application properly. Barring judicial and administrative compulsory requirements, the Service Center will not provide inquiry or photocopying services.

Please visit the official website of China International Import Expo (<https://www.ciie.org/>) to download relevant appendix. During the CIIE, an intellectual property protection and complaint body will be set up in the Service Center to accept and deal with the intellectual property disputes and provide advice on intellectual property-related issues for the reference of consultants.

Appendix 11 Measures for Suspected Infringement of Intellectual Property Rights at the China International Import Expo

1. General Provisions

- 1.1 These Measures are hereby formulated in accordance with the relevant laws and regulations of the People's Republic of China concerning intellectual property, in order to strengthen the protection of intellectual property during the China International Import Expo (hereinafter referred to as the "CIIE"), to maintain order at the exhibition, and to protect the legitimate rights and interests of exhibitors and owners of intellectual property rights (hereinafter referred to as the "IPR").
- 1.2 These Measures apply to complaints regarding suspected acts concerning intellectual property infringements occurring in the exhibition hall during the CIIE, and to the handling of said complaints.
- 1.3 The term "intellectual property" as mentioned in these Measures refers to patent rights, trademark rights, copyrights and other rights conferred in accordance with relevant laws and regulations of the People's Republic of China on intellectual property.

2. Duties and Obligations

- 2.1 In order to protect the legitimate legal rights and interests of exhibitors and intellectual property right owners, the CIIE organizer (hereinafter referred to as "Organizer") performs the following duties:
 - 1) Formulation of measures for handling complaints regarding the suspected acts of intellectual property infringement;
 - 2) Establishment of a Service Center for intellectual property protection and commercial dispute resolution (hereinafter referred to as the "Service Center") during the CIIE, to which relevant experts shall be invited for conciliation and processing of complaints regarding suspected acts of intellectual property infringement, in accordance with the relevant provisions of the CIIE, and to provide relevant intellectual property consultation to the consultant for reference; and
 - 3) Cooperation with administrative IPR departments, etc. for intellectual property protection.
- 2.2 Exhibitors shall sign the exhibition participation contract and perform the following obligations regarding intellectual property protection:
 - 1) Undertake that their exhibits, exhibit packing, booth design, promotional items, other exhibition booth components and other exhibition items (hereinafter collectively referred to as the "Exhibition Items") do not infringe upon the intellectual property rights of others;
 - 2) Make available for reference certificates of intellectual property ownership and relevant certification materials when participating in the CIIE; and
 - 3) Cooperate with the Service Center in the resolution of any complaint regarding suspected infringement of intellectual property that they might be subject to during the CIIE.
- 2.3 In order to preclude suspicion of intellectual property infringement acts, exhibitors are recommended to review the intellectual property status of the items to be exhibited before participation in the CIIE; exhibitors who have not applied for a patent or trademark registration for said items may do so, as required, in accordance with the relevant laws and regulations of the People's Republic of China.

- 2.4 The Service Center may provide consultation services related to IPR, publish and distribute IPR-related guidance, and provide information on Chinese IPR laws and regulations, on the application for IPR, and the safeguarding of IPR, etc. to promote better understanding of the Chinese IPR protection laws and policy environment among exhibitors and buyers.
- 2.5 The Service Center will publish and distribute IPR brochures, carry out various forms of IPR publicity and consultation activities, as well as publicize and disseminate information regarding the measures for the protection of IPR adopted during the CIIE in order to enhance the awareness of exhibitors and buyers regarding IPR protection.

3. Complaint Application

- 3.1 If an intellectual property right owner discovers an Exhibition Items suspected of infringing his/her intellectual property rights on display in the exhibition hall, any complaint to the Service Center must be filed in person; the Service Center will not accept complaints filed by other methods such as telephone or email.
- 3.2 The complainant shall submit the following materials when filing a complaint:
 - 1) An Application for Complaint (Annex 1);
 - 2) Copy of the complainant's identity certificate and materials as the main body, which shall be signed and stamped with seal;
 - 3) Evidence of the suspected intellectual property infringement of the Exhibition Items that are complained;
 - 4) Legal and valid certificates of intellectual property ownership, including but not limited to the following: (in the case of patents) letters of patent, patent announcement texts, identity certificate of the patentee, and legal status certification of the patent; (in the case of trademarks) evidence of trademark registration document, and identity certificate of the trademark owner; (in the case of copyright) copyright certificate and identity certificate of the copyright owner; other materials providing evidence of the legal status of intellectual property; and
 - 5) Power of attorney and the identity certificate document of any agent (where an agent is entrusted on the complainant's behalf in order to file a complaint). The power of attorney shall be signed or sealed by the principal, and shall specify the entrusted tasks and the scope of the power of agency.

The Service Center may also require the complainant to present detection and inspection reports, publicly available documentation (patent documents, textbooks, magazines, etc.) and/or other materials, depending upon the specific conditions of the complaint case.

- 3.3 Where materials submitted by the complainant, such as identity certificates and intellectual property ownership certificates are sourced extraterritorially, the evidence shall be subject to the certification of the notarization authorities of the country concerned and shall be authenticated by the embassy of the People's Republic of China at the said country, or shall be subject to the certification formalities as provided in the relevant treaties concluded between the People's Republic of China and the said country. Where materials submitted by the complainant concerned are sourced from Hong Kong Special Administrative Region (HKSAR), Macao Special Administrative Region (MSAR) and the Taiwan region, the relevant applicable formalities shall also be completed.

The complainant shall ensure that the materials submitted are genuine, legitimate and valid. Materials in foreign languages shall be submitted together with a Chinese translation thereof, and shall ensure its accuracy as well.

- 3.4 A complaint under any of the following circumstances will not be accepted by the Service Centre:
- 1) Where the complaint of suspected infringement has been submitted to the administrative IPR department, or the complainant has filed a lawsuit in the People's Court, or an application for arbitration has been made to an arbitration institution, and the procedure of these complaints has not yet been completed or concluded;
 - 2) Where the intellectual property is invalid or currently undergoing a request for nullification;
 - 3) Where the intellectual property whose ownership is disputed is currently being mediated or handled by the administrative IPR departments, or subject of a case being heard by the People's Court; or
 - 4) Where the materials submitted by the complainant fail to meet the requirements of Article 10 and Article 11 hereof.

4. Complaint Handling

- 4.1 After accepting the complaint materials that meet the requirements, the Service Center shall promptly notify the respondent, and request the respondent to submit a reply within a twenty-four (24) hour period.
- If the respondent believes that the Exhibition Items subject to the complaint does not constitute infringement, the respondent shall provide the Service Center with legal and valid intellectual property ownership certificate(s) and other evidence of non-infringement; otherwise, the Service Center receives the aforesaid materials, and believes that the respondent does not infringe the intellectual property right, and shall notify the handling results to the complainant; if the respondent cannot submit the aforesaid materials, the respondent shall sign the Letter of Commitment (Annex 2) and voluntarily remove said Exhibition Items, thereby discontinuing exhibition for the duration of the CIIE. The Letter of Commitment shall be prepared in duplicate, the respondent and Service Center each retaining one copy and the Service Center shall notify the handling results to the complainant.
- 4.2 The Service Center shall give due consideration to the opinions of the complainant and the respondent, and may organize mediation as appropriate; if they reach consensus on mediation, the complainant and the respondent shall sign a memorandum of mediation, which shall be executed in triplicate, with the complainant, the respondent and the Service Center holding one copy each.
- If the respondent fails to provide relevant evidence within the specified reply period, or the materials provided fail to prove non-infringement, and the respondent does not voluntarily remove the Exhibition Items suspected of infringement, the Service Center shall transfer the materials received from the complaint to the relevant administrative IPR departments, to be dealt with in accordance with the law, and inform the complainant accordingly.
- 4.3 Where the respondent violates the Letter of Commitment and re-exhibits Exhibition Items suspected of infringement at the current CIIE, the Service Center may advise the CIIE organizer to, in accordance with the terms of the exhibition contract, deal with the situation, or cancel the respondent's exhibition rights to attend the current CIIE.
- 4.4 If the complainant or the respondent refuses to accept the outcome of handling made by the Service Center, or fails to reach mediation under the auspices of the Service Center, the Service Center shall inform the complainant or the respondent of the way and procedures to apply for handling at relevant administrative IPR departments and judicial organs.
- 4.5 The complainant and respondent shall abide by the provisions relevant to maintenance of order at the exhibition. Exhibitors and buyers affecting the order of the exhibition shall be subject to sanction as per the relevant provisions on maintenance of order at the exhibition.

- 4.6 The Service Center shall establish an archival system for complaints, maintain timely records of complaints with the settlement outcomes, and perform statistical analysis thereupon. The relevant information may be passed on to relevant departments based on the requirements of their tasks, so that it can be referred to during the qualification and evaluation of exhibitors for the next CIIE.

5. Supplementary Provisions

- 5.1 These Measures shall be subject to the interpretation of the China International Import Expo Bureau.
- 5.2 These Measures shall be effective from the date of issuance.
Relevant annexes are available for downloading from the official website of the CIIE (<https://www.ciie.org/>).

Appendix 12 Measures for Commercial Dispute Prevention and Settlement of Complaint at the China International Import Expo

1. These Measures are hereby formulated in accordance with the relevant laws and regulations of the People's Republic of China and the relevant management regulations of the China International Import Expo (hereinafter referred to as the "CIIE"), for coordination and the resolution of commercial disputes between exhibitors and buyers at the CIIE, to maintain order at the CIIE, and to protect the legitimate rights and interests of the parties that concluded transactions at CIIE.
2. These Measures apply to the prevention of commercial disputes between exhibitors and buyers at the CIIE (hereinafter referred to as "commercial disputes"), and to settlements of related complaints.
3. Exhibitors and buyers of the CIIE shall follow the principles of fairness, voluntariness, equality and good faith during their negotiation of transaction intention as well as conclusion and performance of the contract.
4. Exhibitors and buyers are recommended that after reaching upon an agreement on certain transaction, both parties shall conclude a contract in writing specifying such terms as the contract object, quantity, quality, price or remuneration, time of performance, place and method of performance, liability for default, and dispute settlement resolution. The contents of the contract should be clear, specific and complete in order to mitigate trade risks and expedite settlement of any dispute that might arise.
5. Should a commercial dispute arise between the exhibitor and the purchaser, the parties are encouraged to resolve disputes through amicable negotiations. Should these negotiations fail, the parties may file a complaint and request for dispute settlement in accordance with these Measures, or settle the dispute according to the dispute resolution mutually agreed by both parties.
6. CIIE organizer will establish an Intellectual Property Protection and Commercial Dispute Settlement Service Center (hereinafter referred to as the "Service Center") during the CIIE to accept complaints concerning commercial disputes. CIIE organizer, the China International Economic and Trade Arbitration Commission (hereinafter referred to as the "CIETAC") and other relevant organizations will jointly dispatch staff to the Service Center, for the acceptance and settlement of commercial dispute complaints, and for provision of commercial legal consultation services to the consultants for reference.
7. The Service Center may publish and distribute relevant consultation materials, and provide information on Chinese laws and regulations on foreign trade, prevention of risks relating to international trade laws, commercial arbitration, etc. to improve exhibitors' and buyers' understanding of the Chinese law and policy environment.
8. According to the needs of exhibitors and buyers, the Service Center may carry out various forms of commercial legal consultation services to enhance the legal awareness of exhibitors and buyers, and to provide the guidance on standardization of transactions.
9. A commercial dispute complaint shall not be filed unless the following conditions are satisfied:
 - 1) The complainant and the respondent shall be exhibitors or buyers participating in the CIIE, with a requirement of presence in the exhibition hall;
 - 2) A complaint shall be filed to the Service Center by the complainant in person; and complaints filed by other methods such as by telephone or email would not be accepted; and

- 3) The complainant shall provide the materials prescribed in Article 10 hereof.
Where the respondent is not present in the exhibition hall, the Service Center may assist the complainant in coordinating with the relevant department or agency.
10. The complainant shall provide the following materials when filing a complaint:
 - 1) Application for Complaint (Annex);
 - 2) Valid documents and related identity documents demonstrating the complainant's participation in the current CIIE;
 - 3) Evidence related to the commercial dispute, including but not limited to trade contracts, payment vouchers, proof of correspondence, etc.;
 - 4) Power of attorney and the identity certificate document of the agent (where an agent is entrusted to make the complaint on the complainant's behalf). The power of attorney shall be signed or sealed by the principal, and shall specify the entrusted tasks and the scope of the power of agency; and
 - 5) Other materials that the Service Center requires to be submitted.
11. All the materials submitted by the complainant shall be genuine, legitimate and valid. Materials in foreign languages shall be submitted together with a Chinese translation thereof.
12. Upon receipt of a complaint, the Service Center deems it compliant with Articles 9 and 10 after examination hereof, it shall accept such complaint and inform the respondent through the contact information provided by the complainant.
13. After accepting the complaint, the Service Center shall request relevant information from the complainant and the respondent, and mediate between both parties.
14. If the mediation is successful, the Service Center may render a mediation agreement, which shall be signed or sealed by both parties or their agents; alternatively, the parties may also conclude a settlement agreement on their own.
If the parties conclude a mediation or settlement agreement, they may, based on the arbitral agreement reached by both parties, request the CIETAC to render an arbitral award in accordance with the terms of the mediation or settlement agreement.
The arbitration award shall be enforceable, which shall be promptly and fully performed by both parties. Where one party fails to perform it in accordance with the arbitration award, the other party may apply to a competent court for enforcement in accordance with the law.
15. If mediation is unsuccessful, the parties may settle the dispute in accordance with an agreed dispute settlement resolution. In the absence of such an agreed resolution, it is recommended to make specific arrangements for the settlement mode of the dispute.
16. Exhibitors and buyers shall cooperate with the Service Center and abide by the relevant provisions regarding the exhibition order at the CIIE, and shall not affect the order of the CIIE due to disputes. Exhibitors and buyers affecting the order of the CIIE shall be subject to sanction as per the relevant provisions regarding the maintenance of order at the CIIE.
17. The Service Center shall establish an archival system for complaints, maintain timely records of complaints with the settlement outcomes, and perform statistical analysis thereupon, so that reference can be made to the relevant information during the qualification and evaluation of exhibitors for the next CIIE.
18. These Measures shall be subject to the interpretation of the China International Import Expo Bureau.
19. These Measures shall be effective from the date of issuance.
Relevant annex is available for downloading on the official website of CIIE.

Appendix 13 Notice on Prohibited and Restricted Items

To ensure the National Exhibition and Convention Center (Shanghai) (NECC (Shanghai)) is safe and orderly during the China International Import Expo (CIIE), the Shanghai Municipal Public Security Bureau has formulated and issued relevant guiding opinions on the regulation of items during the CIIE and defined a list of prohibited and restricted items. Exhibitors, their constructors and staff, as well as audiences are reminded to consciously abide by the regulations on prohibited and restricted items to ensure the safety and order of the CIIE. The list is as follows:

1. List for Prohibited and Restricted Items

1.1 Prohibited Items

Prohibited items refer to those that violate Chinese laws and regulations. Security personnel shall confiscate prohibited items according to the law, or immediately carry out emergency response, and detain the carriers and relevant personnel for investigation according to the law, if any such items are found. Prohibited items in NECC (Shanghai) include:

- 1) Guns, ammunition and explosives.
- 2) Replica guns and controlled instruments including crossbows, bows and arrows and daggers.
- 3) Inflammables and explosives including fireworks and firecrackers, oil and ethyl alcohol.
- 4) Toxic and corrosive hazardous chemicals and radioactive substances, including but not limited to strong acid and radioactive isotope.
- 5) Dangerous substances including hazardous biologic preparations and pathogens of infectious diseases.
- 6) All narcotics, including heroin, cocaine, marijuana and crystal meth.
- 7) Other items clearly prohibited by Chinese laws and regulations.

1.2 Restricted Items

Restricted items refer to those that are not allowed to be brought into the exhibition halls, since they might affect the security and operation of the NECC (Shanghai), although they do not violate Chinese laws and regulations. If discovering restricted items, security personnel shall require carriers to discard them in the designated containers, or place them (temporarily) in storage, or otherwise dispose of them by themselves. Restricted items in NECC (Shanghai) include:

- 1) A variety of soft and hard packaged beverages, including but not limited to water, tea, drinks (especially alcoholic ones).
- 2) Banners, slogans, billboards and other promotional items used for politics, race, religion or business, or those violating Chinese laws and regulations.
- 3) All travel tools, excluding strollers and wheelchairs and including but not limited to mopeds, electric bicycles, motorcycles (including mopeds), scooters, bicycles, skateboards and roller skates.
- 4) UAVs (unmanned aerial vehicles) and other low, slow and small (LSS) aircrafts.
- 5) Animals (excluding service animals like guide dogs).
- 6) Items that easily hurt people, including bats, long sticks, stick umbrellas and sharp objects.
- 7) Balls, bats, flying saucers and similar items.
- 8) Large cases and bags which are not suitable to be taken into the NECC (Shanghai) and exhibition halls.

- 9) Flags with a developed area of over 2 m*1 m, and flagpoles longer than 1 m.
- 10) Unauthorized items that might interfere with the electronic signals of wireless communication, cluster signals in the NECC (Shanghai), or might prevent others from visiting the exhibition halls, including but not limited to laser facilities, public address equipment, interphones and radio equipment.
- 11) Ignition tools including lighters and matches.
- 12) Other items that might be hazardous or violate Chinese laws and regulations, including injectors, agentia and kites.

1.3 Notes

- 1) For any exhibits covering prohibited or restricted items such as knives, exhibitors shall apply for filing with the organizers for record in written form before the exhibits enter the NECC (Shanghai). The applicants shall be responsible for the safety of its exhibits.
- 2) Special staff such as the media, with necessary equipment or supplies, can enter the NECC (Shanghai) after the security check, subject to strict management by the competent department.
- 3) The maintenance and technical service personnel, with necessary maintenance tools and essential items, can enter the NECC (Shanghai) after the security check, subject to strict management by the competent department.
- 4) Professional etiquette personnel and cast members are permitted to take a small number of necessary cosmetics such as mousse and hair spray after identification, provided that their department must provide a personnel list, and make a commitment on liability guarantee.
- 5) The prohibited and restricted items do not include: wheelchairs, walking sticks, walking frames and other relatively long carry-on necessary equipment for the people with disabilities, and the carry-on necessary repair tools for the people with disabilities in wheelchairs.
- 6) A small amount of first-aid medicine and necessary medical supplies that a disabled person carries are not included in the list of prohibited and restricted items, but they may be brought in only after the confirmation by service personnel for the people with disabilities.
- 7) The security personnel shall explain relevant regulations to those examinees carrying special drinks for special populations, such as infant milk and beverages for diabetics, all of which may be carried after on-site trial and registration, and be handled as particular cases.
- 8) It is allowed to carry with solid drugs within reasonable limits. Drugs in aqueous solutions are not allowed to carry in principle, but if they are used to ensure actual needs, they can be carried and handled as particular cases after on-site trial and registration.
- 9) Laptops are subject to individual inspection in the X-Ray equipment.
- 10) In principle, examinees with decorative items like flowers shall accept the check in the X-Ray equipment, and large bouquets shall be checked by the security personnel by hand.
- 11) For those examinees who declare that they are pregnant or carry a pacemaker, the security personnel shall inform them that the security equipment has no adverse effect and they can accept the security check. When examinees still refuse to accept inspection through the security door or instrument and equipment, the security personnel shall conduct the inspection by hand.
- 12) For the suspicious airtight items or packages discarded by examinees, the security personnel shall ask examinees to pick up them quickly and accept unpacking or vessel-opening inspection, or put them into the X-Ray equipment for inspection if necessary. The carrier shall be at the site during the inspection, and can only be released after safety confirmation.

2. List of prohibited and restricted items carried by licensed vehicles

The policy on prohibited and restricted items carried by licensed vehicles is subject to the policy on prohibited and restricted items carried by people. Vehicles are allowed to carry necessary maintenance tools and emergency survival equipment, including but not limited to jacks, fire extinguishers, escape hammers and wrenches, screwdrivers, etc.

3. Declaration Procedures

The management of prohibited and restricted articles for personnel and vehicles for the 4th CIIE will be implemented on October 24 (subject to the time confirmed by both parties) when NECC was closed and under control. The types of prohibited and restricted articles shall be subject to List of Prohibited and Restricted Items Carried by People and Vehicles to CIIE issued by Shanghai Public Security Bureau. Units and individuals who bring prohibited and restricted items into the exhibition halls must declare the items. The specific declaration procedures are as follows:

3.1 Online registration and declaration procedures

- 1) Exhibitors and constructors shall log onto the online exhibition affairs system to fill out and submit Form 17: Form of Registration of Prohibited and Restricted Items according to the requirements for entry of prohibited and restricted items
- 2) The registration forms of exhibitors will be checked online by the Exhibition Department of the CIIE, and the registration forms of constructors by the Exhibition Affairs Group;
- 3) After the examination, an electronic seal will automatically generate on the form, and the exhibitors and constructors may download and print them voluntarily;
- 4) Regarding those who are unable to apply online, the organizer will open an email application channel. Exhibitors and constructors can fill in the E-form and send it to the Exhibition Department and Exhibition Affairs Group of CIIE for review. After the approval, a PDF copy will be sent to exhibitors or constructors by email for printing;
- 5) When entering the venue, exhibitors and constructors shall provide the foregoing stamped form that has passed the review to the security personnel during security check, and may only bring relevant items to the venue after on-site inspection.

3.2 On-site registration and declaration procedures

- 1) The organizer will set a form-filling service desk on the on-site service points (center channels of each point);
- 2) The demand side may fill out the paper triplicate form of the Form of Registration of Prohibited and Restricted Items on the spot;
- 3) After being filled out, the form shall be submitted to the on-site staff for review;
- 4) When it passes the review, the staff will keep one sheet for record and return the remaining two sheets to the demand side that filled out the form;
- 5) The demand side may give one sheet to the security personnel during security check and enter the venue with relevant items after passing the on-site inspection.

Appendix 14 Manual for Lifting Point Service in the China International Import Expo

1. Overview

- 1.1 This section mainly introduces the parameters of lifting points in exhibition halls, the applicable scope of lifting point service, as well as its standards and process.
- 1.2 Shanghai High-fair Advertising & Engineering Co., Ltd. is the designated service provider of lifting points for this China International Import Expo.

- 1.3 All booths applying for lifting point service shall meet the requirements on booth design and construction stipulated in the Exhibitor Manual for China International Import Expo, this Manual and other relevant regulations.
- 1.4 Applications for lifting point service shall be made in advance according to the declaration time. Applications for lifting points of on-site drawings are not allowed after move-in.
- 1.5 Users (Construction service providers) applying for lifting point service can rent hoists equipment uniformly provided by the exhibition hall or bring their own hoists equipment that meet the standards.
- 1.6 China International Import Expo Bureau and National Exhibition and Convention Center (Shanghai) Co., Ltd. reserve the right of final interpretation.

2. Scope of application

- 2.1 Lifting point service of the 4th China International Import Expo is available in the North Hall (NH), the ground floor of the double-floor exhibition hall (4.1H, 5.1H, 6.1H, 7.1H and 8.1H), and the second floor of the double-floor exhibition hall (6.2H, 7.2H and 8.2H) of National Exhibition and Convention Center (Shanghai).
- 2.2 What to be lifted: lighting fixtures, projectors, lamphouses, signboards, suspended ceilings, as well as trusses and metal frame structures used to suspend these facilities.
- 2.3 Lightweight hanging flags with advertisement (including but not limited to printing cloth, gridding cloth, movable gum, and light cloth) are not included in lifting point service.
- 2.4 The lifting point service provider is responsible for providing lifting points, installing hoists and retrieving chains.
- 2.5 Users (Construction service providers) may prepare hoists equipment and Truss connecting the suspended objects and the lifting points or apply for rental from the Exhibition Venue. (The construction service provider with hoist equipment shall undertake hoist hanging, hoist lifting and chain recovery work voluntarily, and shall provide vehicles and operators required for hoist voluntarily)
- 2.6 Suspended objects shall be prepared and assembled by the Construction service provider of the lifting point.

3. Parameters of lifting points

Hall No.	4.1Hall/5.1Hall/6.1Hall/ 7.1Hall/8.1Hall	5.2Hall/6.2 Hall/ 7.2 Hall/8.2Hall	North Hall (NH)
Lifting point bearing	≤150kg (with hoist and chain)		
Single structure	≤1800kg		
load limit	10.3m	17m	17m
Height limit of hanging objects	The height of the hanging object's top edge should be less than or equal to 8.5m.		
Note: If the monomer structure exceeds the weight limit, the lifting point shall be added according to the regulations, and electric hoist hall be applied to lift.			

4. Schematic Diagram of lifting point system in exhibition halls

Schematic Diagram of the first-floor basic structure

Schematic Diagram of the second-floor basic structure

5. Charging Standards

5.1 Lifting point service charge

Item	Specification	Unit price (yuan) (RMB/exhibition period)
Lifting point service charge	Lifting point	4,400 yuan/piece

Note:

Lifting point service charge must be paid to the Exhibition Venue before October 10, 2021, and the Exhibition Venue will arrange the system order and installation after receiving the payment.

5.2 Equipment rental fees

Item	Name/Specification	Unit price (yuan) (RMB/exhibition period)
Hoist rental	Manual hoist 15m chain (1 ton)	660 yuan/piece
	Manual hoist 25m chain (1 ton)	990 yuan/piece
	Electric hoist 15m chain (1 ton)	2,640 yuan/piece
	Electric hoist 25m chain (1 ton)	3,300 yuan/piece
Truss rental	Truss (original Aluminum color) 300*300	220 yuan/m
	Truss (original Aluminum color) 400*400	330 yuan/m

Notes:

Hoist rental service includes the placement of electric hoists, collection of hoists and hoist chains, and hoist electric charge.

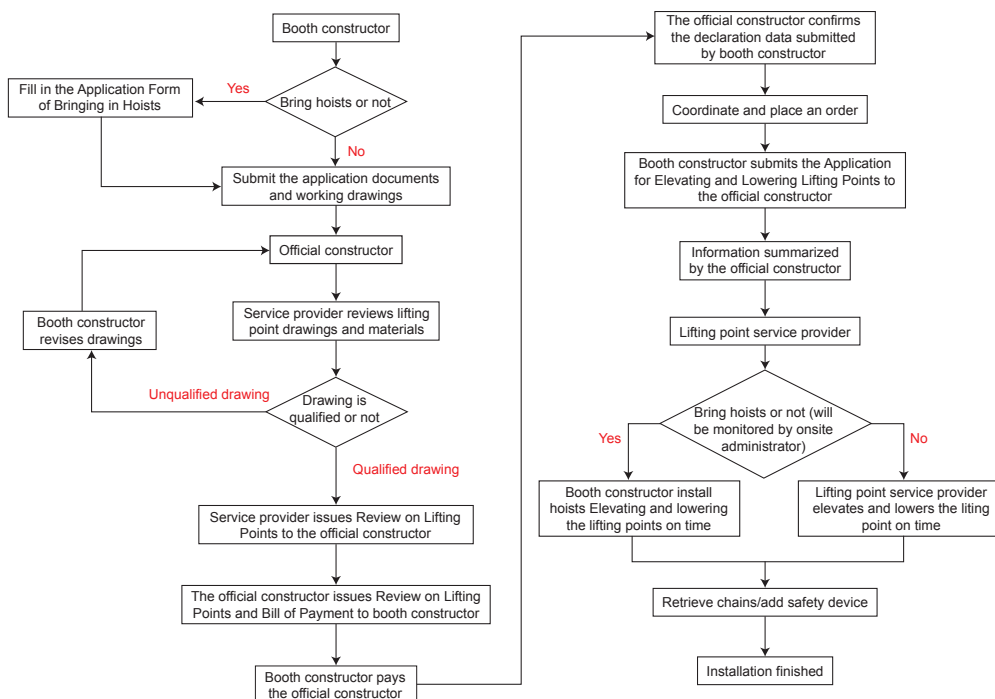

Truss rental service includes Truss and related parts and components required for assembly. Please prepare adapters should you need special assembly.

The length of Truss that can be rented shall be whole numbers, with meter as the unit.

Equipment rental fees must be paid to the Exhibition Venue before October 10, 2021, and the Exhibition Venue will arrange the system order and installation after receiving the payment.

6. Procedures and requirements of lifting point service application

6.1 Procedures of lifting point service application

6.2 Requirements of lifting point service application

- 1) Construction service provider shall submit lifting point service or equipment rental applications and the first edition of application documents (electronic version) **before September 15, 2021**. The number of lifting points, lifting point positions, or equipment rentals shall be confirmed **before October 10, 2021**, and the confirmed version of application documents (one printout with seal) shall be submitted to the official constructor. Application after the deadline is not acceptable.
- 2) Applications for lifting points of on-site drawings are not allowed after the move-in.
- 3) Applications for equipment rental submitted after the deadline can be confirmed to place orders after document review and on-site implementation confirmation. The venue reserves the right to unconditionally reject applications for the rental of hoisting points and equipment that are submitted beyond the deadline or not completed within the specified time.
- 4) List of documents of reviewing applications for lifting point services:

1	Confirmation Form of Lifting Point Service Supplies in Exhibition Halls (Please see Appendix 18 for details) The confirmed version shall be the printout with seal.
2	Letter of Commitment on Application for and Use of Lifting Point Service in Exhibition Halls (Please see Appendix 19 for details) The confirmed version shall be the printout with seal.
3	Application for Elevating and Lowering Lifting Points (Please see Appendix 20 for details) Application shall be submitted one day in advance, and the confirmed version shall be the printout with seal.
4	Application for Bringing in Hoists (Please see Appendix 21 for details) The confirmed version shall be the printout with seal.
5	Map of Lifting Point Structures (Template attached hereto) The Map shall clearly indicate the size and weight of each lifting point structure, the type, specification, and number of the facilities on the structure, and their weight. Please consult the service provider for specific requirements.

- 5) After the suspension proposal is confirmed, the construction shall be conducted in accordance with the confirmed proposal. If lifting points are not installed as the proposal specifies or weigh more than what is described in the application, the Exhibition Venue and the service provider have the right to call off the installation, and the applicant shall increase the number of lifting points or reduce their weight as required.
- 6) If applications are overdue due to the reasons of the booth constructor that include failed suspension proposal, the booth constructor shall bear the costs incurred. If the booth constructor installs lifting points not based on the weight described in the application, the correction costs and losses incurred shall be borne by the booth constructor. The correction costs and losses incurred by personal reasons such as inconformity of the actual weight of lifting points and the approved weight of lifting points.

6.3 Application and notes for bringing in hoists

In the 4th China International Import Expo, the construction service providers are allowed to bring hoists as they deem necessary in the service of lifting points in exhibition halls, and shall observe the following reminders:

- 1) The construction service provider shall submit Appendix 21: Application for Bringing in Hoists.
- 2) The hoists brought in must meet the relevant national safety standards and be accepted as qualified products, and they shall provide relevant documents, including but not limited to hoist product certificates and quality control reports.
- 3) The single structure of lifting points must use hoists of the same brand and specification.
- 4) The lifting point service provider shall provide the arrangement of the lifting point and sling, and the construction service provider shall install the hoists, collect the hoists and the chains, and prepare and install necessary aerial trucks, hoist consoles, etc. The related construction operations must comply with the relevant regulations of the Exhibition Venue and others.
- 5) Aerial workers involved in the operation must be licensed, and the aerial work licenses of construction workers shall be submitted.
- 6) Electric hoist operation should be operated by staff with electrician's certificate, which shall be submitted. The constructor shall be responsible for the power supply of the electric hoist, and the power supply shall meet the normal operation of the electric hoist.

6.4 Application and reminder for elevating and lowering lifting points

- 1) The suspended objects of the construction service provider shall be inspected by the service provider after assembly. Appendix 20: Application for Elevating and Lowering Lifting Points shall be signed by both the user of the lifting point and the provider for each operation of suspended objects, and the operating in booth must be jointly supervised by security personnel and lifting point service provider on site.
- 2) The elevating and lowering of suspended objects at manual hoist booth shall be operated by the user of the lifting points.
- 3) The elevating and lowering of suspended objects at electric hoist rental booth can be operated by the lifting point service provider, and the service provider can adjust the time according to the on-site situation, or arrange console to lift and lower the lifting points according to the application time. The elevating and lowering of suspended objects at the booth with electric hoist brought by the user shall be operated by the construction service provider with its own console.

7. Relevant requirements for using the lifting points

- 7.1 **Any person is strictly forbidden to climb or pull the lifting point structures or suspended objects directly. The adjustment and installation of suspended objects must be based on the height needs, with the corresponding scaffold or aerial truck, scissors lift and other facilities to facilitate the operation.**
- 7.2 The construction service provider shall not increase or decrease the number of lifting points without authorization. If the unit weight of the suspended objects exceeds the total capacity of the lifting point applied for, the construction service provider must apply for additional lifting points.
- 7.3 If the single structure suspended by the manual hoist possesses more than 13 (including 13) lifting points, it needs to be disassembled first. If the structure cannot be disassembled, it needs to be lifted by the electric hoist.
- 7.4 The size of the Truss used for suspended objects shall be less than or equal to 400 mm * 400 mm.
- 7.5 Monomer structure over 48 points must be disassembled and hoisted.
- 7.6 The spacing between each point should not be less than 4.5 meters.
- 7.7 The steel core wires or special lifting straps must be connected separately and vertically with the lifting point provided by the hoist service provider, in accordance with the lifting height limits of the structure.

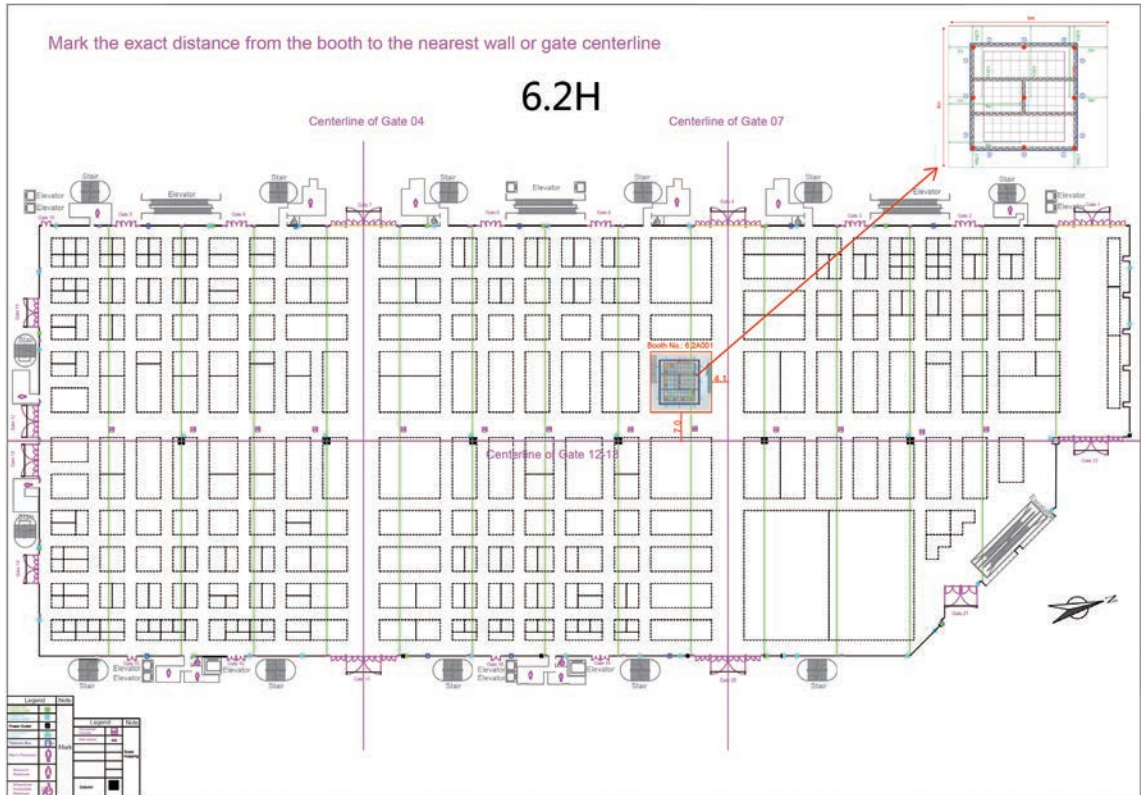

- 7.8 The links used between hanging structure and hoist hook must be the special hoisting shackle, and detailed schematic diagram must be provided when submitting the working drawings.
- 7.9 The suspended objects to be lifted through the lifting points must be solid and reliable metal or steel-wood assembly structure, and pure wood structure, ultra-low acoustics and linear acoustics shall not be hanged. Structures linked to the ground or not supported by lifting points shall not be reinforced or connected by any lifting point. The spacing between the suspension structure and the ground structure must be greater than 10cm.
- 7.10 All lamps must be constructed according to the application working plan.
- 7.11 It is necessary to ensure that each lifting point for the suspended objects and each hoist are under balanced stress, so as to avoid any potential resultant safety hazards in the process of elevating and lowering.
- 7.12 If the suspended objects need to be connected with electricity, their wires must be arranged neatly, high-tension electric wires must be laid with sleeves, and the electric wire joints shall be linked with insulation terminal instead of tape. A separate power control switch must be installed on the ground.
- 7.13 The construction materials used for lifting suspended objects shall comply with the fire safety regulations.
- 7.14 Before elevating the manual hoist, the construction service provider must inform the service provider and lift the suspended objects under the supervision of the service provider. When operating the chain hoist, no one shall be directly under the suspension structure.
- 7.15 The construction service provider must be equipped with the ground clearance ruler when the suspended objects are lifted / lowered.
- 7.16 During the elevating or lowering of the hoist, the structure shall be balanced, and all hoists shall rise or fall synchronously to avoid any unbalance.
- 7.17 In case of any damage to the lifting points of the exhibition halls and related equipment or any injury to personnel due to improper operation of the construction service provider, the provider shall bear all consequences and the Exhibition Venue reserves the right to investigate the relevant legal responsibilities.

Appendix 1: Template for Map of Lifting Point Structures

Please submit the drawings in JPG or PDF format according to the drawing reference template of lifting point structure. The size of single JPG or PDF document is not more than 1M. If the drawings fail to pass the review, the whole set of modified drawings shall be uploaded again.

1. Booth Position & Orientation

Booth No.:

Notes:

Attach the top view of all booths applying for lifting points to the floor plan of the exhibition hall with the center line to confirm the opening direction of the booths.

Mark the exact distance from the booth to walls, columns or gate center line.

The red line is the centerline of the gates of the exhibition hall, and the green line is the construction road of the exhibition hall.

List of Hangings				
Legend	Materials	Quantity	Weight(KG)	Total Weight(KG)
●	Hook and Chain	9 pcs	30	270
①	Model of Lighting Fixture	18 pcs	5	90
■	Modeling Grid	1 item	125	125
■	Flexible Film	36 sqm	8	288
■	Aluminum Rack	36 m	8	304
Total Weight of Hangings:			1077	
Position of Lifting Point		Quantity/Unit	Unit Load Bearing	Total Load Bearing
		9	150	1350

↔ Booth Size
↔ Size of Lifting Points from the Edge of the Booth

Notes:

Mark the position of the lifting points applied by the booth and the distance of each lifting point from the edge of the booth. Provide the point positions, quantity and weight of each hanging. Provide the specification, weight and length for the lifting rack.

3. Detailed Illustration of Materials and Weight of the Hanging Structure

Booth No.:

Notes:

Mark the material, dimension and weight of each structure of the hanging. Provide a construction drawing of the metal structure. It is required to provide a construction drawing of the internal metal structure for hangings with steel-wood structure.

4. Height Chart of Hanging from the Ground

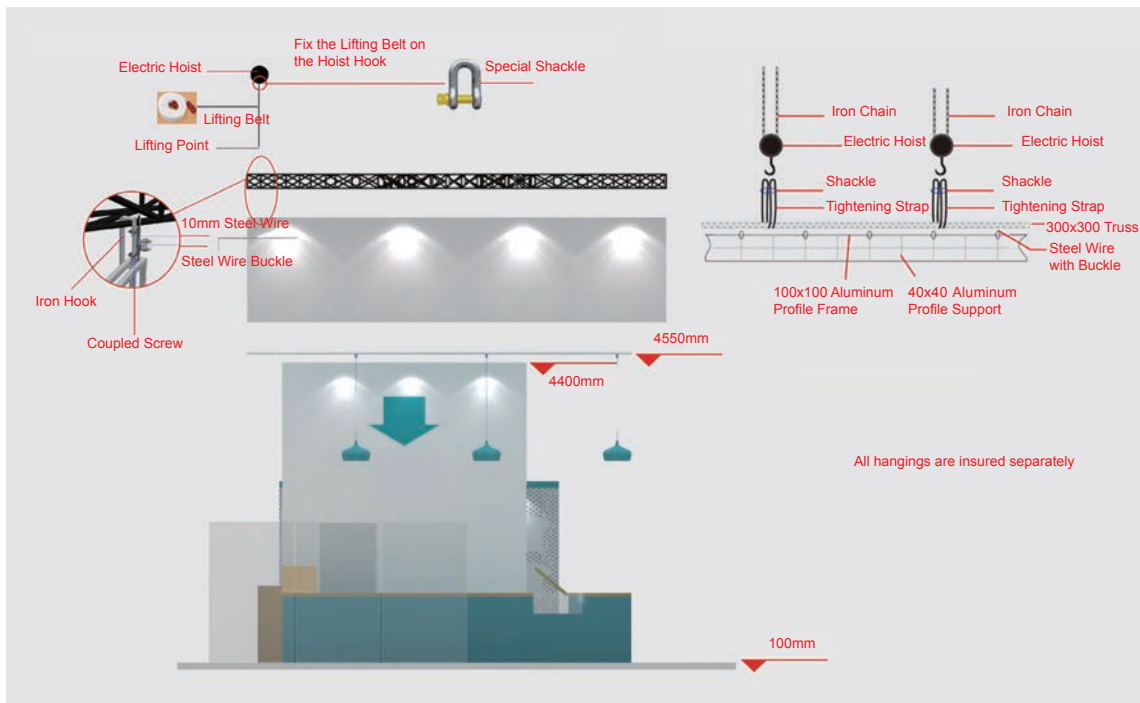

Booth No.:

Note: Mark the height of the upper edge of hanging from the ground.

5. Connection Mode of Hangings

Booth No.:

6. Multi-Angle Rendering

Booth No.:

Note: A multi-angle booth rendering, including but not limited to front view, side view, top view and others.

Appendix 15 Financial Services

As the only official ‘Comprehensive Banking Enterprise’ of CIIE by the Ministry of Commerce in China and one of the strategic partners and financial service providers of the event, Bank of China provides comprehensive financial services covering pre-exhibition, in-exhibition and post-exhibition for CIIE.

1. Five Advantages of Bank of China's Services

Advantage of global networks: Bank of China has established nearly 600 overseas branches in 61 countries and regions around the world, including 24 countries along the Belt and Road.

Advantage of integrated services: Bank of China is moving forward in building a strategic development landscape characterized by a domestic commercial bank as the main body and integrated global service as its two wings, and serves the “dual circulation” in which the domestic and overseas markets reinforce each other. Bank of China provides corporate clients around the world with superior, efficient and personalized full-range financial services so that they can invest, operate, and transact inside and outside China smoothly and sustainably.

Advantage of foreign trade services: The volumes of international settlement and cross-border RMB settlement of Bank of China have been the 1st rank in China for years, and Bank of China provides support in settlement service for nearly one third of China's foreign trade import and export business, and is the main channel and service provider of China's import trade settlement. Following the national opening up policy and participating in the establishment of Lin-Gang special area of the Shanghai Pilot Free Trade Zone and Hongqiao International Opening-up Hub, Bank of China is taking advantage of its synergy backed by global and regional service network, and has become the key participant in the design process of foreign exchange and foreign trade policies, and the pacemaker in the innovation of overseas operations,

Advantage of exhibition service experience: Bank of China, as the official banking partner of the 2008 Beijing Olympic Games, the Paralympic Games, the 2022 Beijing Winter Olympic Games and the Winter Paralympic Games, as well as the financial service provider for large-scale exhibitions such as Canton Fair and Shanghai Fair, is highly experienced in hosting and undertaking large-scale events.

Advantage of on-site service: Bank of China especially has built a full-functional branch in the National Exhibition and Convention Center (Shanghai) that covers an area of nearly 3000 square meters. It is also the largest and mostly comprehensive bank outlet with a great capability nearby.

Advantage of international specialists: Bank of China recruits about 30 kinds of small language professionals in addition to English. At the same time, many experts of Bank of China serve as core members in ICC, FCI and SWIFT. They are proficient and involved in the formulation of international business rules for years.

2. Comprehensive Financial Service Solutions of Bank of China

Bank of China can provide one-stop service solutions which including policy consultation, foreign currency exchange, international settlement, letter of guarantee, financing, cash management, customs clearance assistance and customized services for overseas exhibitors participating in CIIE. Bank of China majors in helping overseas exhibitors to expand the Chinese market with omnibearing financial support.

Information consulting: Bank of China will act as CIIE comprehensive policy advisor for overseas exhibitors, who deeply understand the need of overseas exhibitors to participate in CIIE, including but not limited to cross-border RMB settlement and foreign exchange management policies, overseas quick payment and settlement, accounts payable management, import trade financing and so on. Bank of China supports overseas exhibitors to take full advantage of CIIE as an international platform to expand global businesses.

Cross-border services: Bank of China will fully cooperate with overseas exhibitors through domestic and foreign network to provide diversified financial products under cross-border trade, such as offshore RMB remittance, forward and swap, foreign currency exchanges, RMB settlement, cross-border settlement, standby letter of credit for financing, global cash management, centralized operations of foreign exchange, all of which to help overseas exhibitors participate in CIIE.

Global matchmaking: Bank of China has hosted the official matchmaking session in CIIE for three consecutive years, the matchmaking consists of numerous rounds of "one-on-one" talks between overseas exhibitors and purchasers, forging deep, efficient and convenient platform to bridge the supply and the demand, and enable more transactions. Starting from the third year, the upgraded Bank of China's GMS (Global Matchmaking System) is implemented in the online and offline Trade and Investment Matchmaking Session, facilitating this largest CIIE supporting event.

Assistance in customs declaration: Bank of China and Chinese Customs have maintained a good cooperative relationship for decades. Bank of China can provide policy consultation and assist in communicating with Customs for overseas exhibitors concerning import and export customs declaration businesses. Meanwhile, the innovative online tax payment product provided by Bank of China can greatly improve customs clearance efficiency for overseas exhibitors.

Customization service: For those multinational group companies, Bank of China can provide a series of customized financial services, such as online and offline cross-border remittances, online supply chain finance and paperless documenting, which deeply coinciding the needs of multinational group companies. Bank of China combines traditional services with mobile internet technology, adheres to the integration of product services and customer needs, enhances risk controlling by means of technical means and assists overseas exhibitors to reach cooperation in CIIE.

Bank of China will continue to play its core role in serving CIIE and take advantage of its globalization and integration to provide comprehensive financial services for overseas exhibitors, so as to promote more global transactions and help CIIE to be held better and better by offering financial force.

Appendix 16 Insurance Services

1. Company Profile

China Pacific Insurance (Group) Co. Ltd. (hereinafter referred to as CPIC, or the Company) is an insurance holding company incorporated on the basis of China Pacific Insurance Company, which was established on May 13, 1991. Headquartered in Shanghai, it is a leading insurance group in China, and the first insurance company simultaneously listed in Shanghai, Hong Kong and London Stock Exchanges.

CPIC stays focused on the core business of insurance, persists in the long-term, pursues high-quality development, with a steady growth of business results. It was listed on the Fortune Global 500 for the 10th consecutive year, ranking 193rd; ranked 5th among the World's Most Valuable 100 Insurance Brands by Brand Finance. In 2020, Group operating income increased by 9.5% from 2019 to RMB422.182 billion; Group OPAT amounted to RMB31.140 billion, an increase of 11.7%; Group AuM grew by 19.2% from the end of 2019 to RMB2,436.080 billion. The Company continuously enhanced its operational and service capabilities and provided services to 147 million customers, projecting an image of "responsibility, intelligence and care". CPIC Life and CPIC P/C won the top AA rating for the 3rd successive year in the regulatory evaluation of customer service.

From 2018 to 2020, CPIC gave full play to its advantage of all-round insurance license to provide one-stop comprehensive insurance coverage and integrated risk management services, for the CIIE. At the same time, through team upgrading, tool upgrading, risk control upgrading, claim settlement upgrading and channel upgrading, CPIC will create the CIIE Services, transforming from sole focus on insurance services to all-round cooperation support.

In order to better serve the Fourth CIIE, CPIC has established a project team led by the headquarters and operated in coordination with its property insurance, life insurance, health insurance, pension investment and other sectors. Relying on the group's abundant resources, CPIC will make every effort to safeguard the smooth progress of the CIIE, striving to provide better services.

II. One-stop Insurance Products and Services

As a core supporting company and a designated insurance service provider of the CIIE, CPIC has tailored the one-stop insurance products and services "CIIE Insurance" to the exhibitors, builders, logistics suppliers and e-commerce service platforms of the Fourth CIIE. The "CIIE Insurance" is classified into basic category and special category, and all kinds of related guarantees can be consulted through email.

1) Basic Category

Interested parties	Insurance coverage	Products
Exhibitors/ builders	Natural disasters and accidents during the freight transportation	Cargo Transport Risk and Additional Risk
		Third Party Liability Insurance of the Goods' Owner
	Financial risk in the transaction of goods	Customs Guarantee Insurance

(Aon provides technical support for this plan)

3. Value-added Services

Focusing on the Fourth CIIE, CPIC will give full play to its risk management expertise and the resource advantages of its headquarters being in Shanghai, to provide first-class insurance service experience for exhibitors. Specifically as follows:

1. Establishing a housekeeping-style insurance service team

CPIC will provide consultation, complaints, return visits, insurance, claims and other all-round, multi-lingual and personalized services for exhibitors.

2. Establishing a professional on-site service team

During the CIIE, professional business backbones of property insurance, life insurance and health insurance sectors will be stationed in the Expo to provide professional services on site.

3. Establishing a professional emergency volunteer team

CPIC will select professional first-aid certified teams to assist in preparing emergency plans, establishing ERTs, providing ERT training, to demonstrate and present PPE equipment free-of-charge, and to provide on-site first-aid supporting services.

4. Providing “Extremely Fast, Extremely Easy and Extremely heartwarming” claims service experience

CPIC will set up exclusive compensation fund for exhibitors and set up green compensation channels; provide 24-hour bilingual (English/Chinese) service channels for overseas exhibitors; In order to deal with emergencies more effectively, during the CIIE, CPIC will specially arrange stationed medical services in surrounding hospitals, providing one-to-one medical services, getting ready for emergency treatment at any time, collecting claim data on site, settling claims as fast as possible;

CPIC will also provide on-site medical rescue, road vehicle rescue, vehicle safety monitoring, SOS domestic and overseas VIP medical rescue services and other additional services as well.

5. Establishing a full life cycle risk control service network

CPIC will set up a 24/7 and all-round risk control service network for exhibitors from preparation to withdrawal; provide disastrous meteorological early warning services, whole process risk management services and emergency volunteer services, etc.

6. Providing “Green Channel” stationed medical services

In order to deal with emergencies more effectively, during the CIIE, CPIC will arrange stationed medical services in surrounding hospitals, providing customers with medical treatment in the first time if needed.

7. Providing “one-to-one” medical services

During the CIIE, in case of an accident, the accompanying staff shall be dispatched at the first time after receiving the accident notice to accompany the injured to the nearby hospital for medical treatment, collect the claim data on site, and handle the claim as fast as possible.

8. Providing online medical services

During the CIIE, CPIC will provide online medical services to exhibitors for real-time communication with doctors; the emergency treatment will be available in no time under the highly efficient medical services.

4. Contact Methods of Insurance Services

Name: China Pacific Insurance (Group) Co., Ltd. Shanghai Branch

Appendix 17 Air Carrier Service

1. Introducing China Eastern

Headquartered in Shanghai, China Eastern Air Holding Co., Ltd. (CEAH) is one of the three major air transportation groups in China and could be traced back to the first squadron established in Shanghai in January 1957. As of the end of 2020, CEAH had a total asset of more than RMB 368 billion and over 100,000 employees. Its business covers air passenger transportation, aviation logistics, aviation finance, aviation real estate, air catering, financial leasing, import and export trade, aviation

media, industrial development, industrial investment, and other aviation highly-related industries. On the basis of establishing a modern aviation service integrated system, CEAH focuses on three pillar industries: full service, low cost and logistics, and strives to build five industry synergies: MRO, air catering, technology innovation, finance and trade, industrial investment.

As the core business of CEAH, China Eastern Airlines Co., Ltd. (CEA) is the first Chinese airline to be listed on New York, Hong Kong and Shanghai stock markets. By the end of 2020, it operates a modern fleet of over 730 aircraft, which is one of the youngest fleets in major airlines worldwide. Moreover, it boasts the largest-scale in-flight Wi-Fi wide-bodied fleet with leading commercial and technical models in China. As a member of SkyTeam Alliance, CEA has extended its flight network from its two core hubs, Shanghai and Beijing, to 1,036 destinations in 170 countries and regions via close cooperation with SkyTeam Alliance member airlines, so as to build “double hubs in two cities with four airports” operating model. The annual passenger turnover of CEA exceeds more than 130 million, ranking top 10 among global airlines.

In recent years, China Eastern has won awards at home and abroad in the fields of operation quality, service experience, CSR, etc., including the Flight Safety Diamond Award by CAAC - the highest flight safety award in China, nine consecutive years of Top 50 Most Valuable Chinese Brands by the world's famous brand rating agency WPP, four consecutive years' nomination of “Global Top 500 Most Valuable Brand” by UK's brand rating agency - Brand Finance, two consecutive years of Top 20 Chinese Enterprises Global Image Award-ranking first in the transportation industry. Additionally, China Eastern got the A rating in the latest ESG (Environmental, Social and Governance) criteria and listed the first place together with the other five airlines, according to global index compiler MSCI.

For more information, please find Official website www.ceair.com, or contact service hotline (+86)95530.

2. Introduction of China Eastern's Preferential Policy for CIIE

China Eastern's preferential policies serve the organizers and participants of this year's CIIE.

Preferential Policy for CIIE Organizers:

After the organizer submits the application, our sales office will help you arrange the itinerary of the participants. We can also assist in arranging the itinerary in China during Expo period.

Preferential Policy for CIIE Participants:

To provide concessionary business class and economy class tickets for participants, delegates could book seat and issue ticket at the designated direct sales office of China Eastern Airlines. For further information, please contact us.

Policy explanation:

1) Application rule for preferential policies (such as number of people, country, etc.)

China Eastern preferential policies for CIIE could be used by groups from all over the world who come to China to participate the Expo, customers in China, as well as Expo organizers (venues, conference centers) and terminal customers (enterprise customers).

Number of participants: The number of participants should purchase no less than 50 tickets for China Eastern Airlines.

According to the domestic flight sales policy, a discount of 5% -10% could be given based on the sales class (including first class, business class and economy class) according to the off-peak season.

2) Application time and channels for preferential policies of CIIE

For the CIIE preferential policies of China Eastern Airlines, please log in the official website of China Eastern www.ceair.com 90 days in advance, or dial China Eastern Service Hotline (+86) 95530 to apply.

3) Could accompanying personnel of CIIE participants such as family members, enjoy these preferential policies?

Members approved by the organizer could enjoy these preferential policies.

Note: The final interpretation of this preferential policy belongs to China Eastern Airlines.

3. Air carrier service

As the "Designated Air Carrier of China International Import Expo", China Eastern Air Holding Co. Ltd (CEAH) will provide ticket discounts for participants travel to Shanghai during the CIIE period.

Applicable personnel include CIIE participants, visitors, invited guests and partners' employees as well as their accompanying personnel. .

China Eastern Service Hotline: (+86) 95530

Appendix 17 Air Carrier Service

1. Strength of China Southern Airlines

China Southern Airlines possesses the largest fleet and the most developed route network, offering the largest passenger capacity among any airline in China. Since 2020, China Southern has been sponsoring the China International Import Expo (CIIE) for two consecutive years as both a Core Supporting Enterprise and a Designated Air Carrier.

During Year 2019, China Southern safely transported more than 152 million passengers, leading all Chinese carriers for 41 consecutive years. The airline is ranked 1st in Asia and 6th globally in terms of annual passenger traffic.

As of December 2019, China Southern had a fleet of more than 860 passenger and cargo aircraft, including the Boeing 787 Dreamliner, B777 and B737, as well as the Airbus A380 superjumbo, A330 and A320. Currently, China Southern operates an extensive route network of more than 1,000 routes with 3,000 daily flights to 224 destinations in 40 countries and regions around the world.

In recent years, China Southern has been fully dedicated to building its comprehensive Guangzhou-Beijing “dual hubs” by launching new routes and optimizing its route network. As the largest hub carrier at the new Beijing Daxing International Airport (PKX), China Southern takes up more than 50% of slot resources. China Southern has actively responded to and provided strong support for China’s “Belt and Road Initiative” and in its key regions of South Asia, Southeast Asia, South Pacific and Central and West Asia through its decades-long well-established route network.

China Southern is singularly honored to hold the best safety record among all Chinese carriers with outstanding safety management levels in the world.

In June 2018, China Southern was honored with the Two-Star Flight Safety Diamond Award by the Civil Aviation Administration of China with the highest safety rating in China.

China Southern is committed to developing a world-class service brand combining “affinity and refinement” to deliver an exceptional and seamless travel experience to all passengers.

In the wake of the COVID-19 outbreak in 2020, China Southern formulated transportation support plans and was the first airline in China to announce the complimentary transport policy for epidemic prevention materials. Major transport missions were completed safely and efficiently with 18,000 medical relief flights operated, which safely transported 25,000 medical staff and 29,000 tons of medical supplies and repatriated 24,000 Chinese citizens who were stranded abroad. As a SKYTRAX-listed Four-Star Airline, China Southern was, in 2016, honored as “The World’s Favorite Airline” and in 2018 named “The World’s Most Improved Airline” by SKYTRAX.

CHINA SOUTHERN

2. Escort with all our strength and enjoy the Expo

1) Exclusive One-on-One Air Travel Service

The corporate account manager team of China Southern Airlines will provide exclusive, one-on-one professional services for airline passengers attending the China International Import Expo (CIIE) and will coordinate air travel services, including planning air travel schedules, providing travel suggestions and presenting detailed travel options.

2) CIIE-Themed Flights

China Southern Airlines' decorated themed flights are exclusive to CIIE. Passengers flying on China Southern's CIIE-themed-flights will be provided with themed boarding passes and photo frames for picture taking, as airline staff manage the entire boarding process.

Inside of the flight cabin, there will be an CIIE exclusive themed layout, decorations and in-cabin announcements.

3) Customized Ground Services

For VIP guests attending CIIE, China Southern Airlines is pleased to provide special travel services, including a one-on-one account manager, exclusive check-in counter, limited-edition luggage ribbons, private VIP lounge and other specialized services, available at CZ self-operated stations.

China Southern Airlines is also pleased to offer convenient ground services including airport pickup, fast boarding and use of a private VIP room.

4) Exclusive Cabin Area

China Southern Airlines will reserve an exclusive area in the cabin for VIP guests attending CIIE, which will create a more comfortable travel environment and upgraded air travel experience.

5) Exhibition Gift Packages

China Southern Airlines is pleased to provide exhibitors, staff and other participants with exclusive exhibition packages including: ticket coupons, VIP lounge vouchers and extra luggage vouchers.

6) Preferential CIIE Flight Ticketing

China Southern Airlines will provide preferential policies for team tickets and exclusive airline travel discounts for guests attending CIIE.

For additional information, please contact China Southern Airlines local account manager.

Appendix 18 Transportation Services

China COSCO SHIPPING Corporation Limited (COSCO SHIPPING) is the world largest shipping company as well as a Fortune Global 500 company. It highlights the “6+1” industrial clusters layout: the 6 industrial clusters include shipping, logistics, finance, equipment manufacturing, shipping services and social services, and the “1” means “Internet Plus” business. Adhering to the business philosophy of value creation and customer orientation, COSCO SHIPPING aims to build a world-class logistics and supply chain service platform for global clients.

中国远洋海运集团

By the end of December 2020, COSCO SHIPPING had operated a total of 1,387 vessels with 111 million DWT, including containerships, bulk carriers, oil tankers, LNG carriers, specialized cargo carriers and passenger ships, ranking No. 1 in the world in terms of total fleet capacity. It has invested in 58 terminals around the globe, with the annual handling capacity of its container terminals amounting to 129 million TEU, taking the first place worldwide. The shipping routes of COSCO SHIPPING have covered more than 1,500 ports in over 160 countries and regions around the world. It has established 10 regional companies all over the world, and set up over 1,600 overseas companies in more than 70 countries and regions.

1. Excellent Shipping and Logistics Services

- In the aspect of container shipping, COSCO SHIPPING has a container fleet of 536 vessels with 3.17 million TEU, ranking No. 3 in the world in terms of fleet capacity. It runs 399 international and domestic shipping routes, consisting of 265 international services (including international feeder services), as well as 54 coastal routes and 80 feeders along the Pearl River Delta and the Yangtze River in China. COSCO SHIPPING can provide services for all sorts of cargoes suitable for container shipping, with the shipping routes reaching all over the world and extending to 352 ports in 105 countries and regions.
- With regard to bulk shipping, COSCO SHIPPING has a bulk carrier fleet of 445 vessels with 42.71 million DWT, ranking No. 1 in the world. The fleet consists of VLOCs as well as Capesize, Panamax and Handysize dry bulk carriers which can provide shipping services for bulk cargoes, such as coal, ore, food and fertilizers, with an annual freight volume of 460 million tons. The corporation has been providing quality service for global clients, such as Vale, BHP Billiton and FMG.
- In terms of energy shipping, COSCO SHIPPING operates a tanker fleet of 218 vessels with 27.9 million DWT, ranking No. 1 in the world. It can provide shipping service for raw materials and finished products of the entire oil and gas industry chain, from crude oil to refined oil products, liquefied natural gas, and liquefied petroleum gas.
- As for general and specialized cargo shipping, COSCO SHIPPING operates a total of 153 vessels with 4.73 million DWT, ranking No. 1 in the world in terms of the fleet size and overall competence. The fleet is comprised of semi-submersible carriers, multi-purpose heavy lift vessels, wood-pulp carriers, car carriers, timber carriers, and asphalt tankers which can provide shipping service for specialized cargoes, such as drilling platforms, mechanical equipment, paper pulp, commercial vehicles, logs and asphalt.

- Concerning logistics service, COSCO SHIPPING is a leading international logistics company in China with a good reputation and excellent service in the industry. It can provide total logistics solutions for clients at home and abroad in various domains, including SODC logistics, warehousing, port logistics, intermodal transport, government logistics platform, shipping agency, integrated cargo transport, project logistics, air freight logistics, chemical logistics, and tallying. The Airbus project is a typical example of project logistics, with 536 aircrafts being transported safely until April 30th 2021.

2. Extensive Experience in Serving CIIE

- COSCO SHIPPING is a core supporting enterprise of CIIE, as well as the only international shipping service provider recommended by the CIIE. It is also one of the officially recommended home transportation service providers and special decoration service providers, providing one-stop services from exhibit transportation to booth setup for the Expo.
- At the third 3rdCIIE, COSCO SHIPPING invited 67 exhibitors in total, and the exhibition area reached 2,133m². In addition, COSCO SHIPPING carried exhibits from 14 exhibitors and 10 countries (regions) including New Zealand, Denmark, Poland, Germany, Sweden, Myanmar, Japan, South Korea and Hong Kong, totaling 43 TEU/500 tons (the 2ndCIIE is 40TEU/268 tons). The shipping exhibits mainly involve four major exhibition areas: food and agricultural products, medical equipment and health care, consumer products and technical equipment, mainly including dairy products, health products, food, cosmetics and skin care products, bulldozers, etc.
- COSCO SHIPPING Air Freight has met the main transportation needs of 577 exhibitors and provides transportation services for 310 exhibitors, totaling 1,747 m³. The air transport section accepts from 13 countries and regions including Canada, the United States, Colombia, France, the United Kingdom, the Czech Republic, Austria, New Zealand, Australia, Vanuatu, Japan, Hong Kong and Taiwan, involving 17 exhibitors, and the total number of exhibits is 5,965 KGS.

3. Continuous Service Guarantee for CIIE

Based on the successful experience at the previous three sessions, COSCO SHIPPING will continue to leverage its global network and offer exhibits for the 4th CIIE 24/7 total logistics solutions that are efficient, timely, safe and economical. It will provide comprehensive shipping and logistics services for exhibitors from all over the world.

Opening a green channel for CIIE and providing guarantee in terms of shipping network, professional team and service platform

- 1) Providing container liner shipping service around the world through its complete global service network;
- 2) Setting up a professional service team composed of excellent staff members who stand ready to provide exhibitors with 24/7 one-stop services;
- 3) Offering a variety of service channels, including the booking platform, e-commerce platform, mobile client and WeChat official account, through which exhibitors can seek various services.

Actively addressing the COVID-19 outbreak and ensuring a smooth global supply chain

- 1) Strengthening epidemic prevention and control, and ensuring safe operation at the various links of transportation, such as ships and ports;
- 2) Accurately analyzing transportation-related control measures around the world to ensure efficient cargo handling;

- 3) Introducing a new operation model by adopting various modes of transportation, including shipping as well as land, railway and air transportation to offer customers convenient and smooth transportation solutions;
- 4) Cooperating with China Post to provide special logistics service, and offering the “shipping + land transportation” solution to postal parcels which cannot be delivered by air.

[International Shipping Services]

As CIIE’s officially recommended international shipping service provider, COSCO SHIPPING is committed to providing exhibitors with a variety of shipping solutions in the areas covered by its overseas agency business.

Recommended Solution	Way of Delivery	Carrier	Exhibitor
